Write me a short 1-2 sentence professional summary which highlights your educational background, your experience, your career goals, and the value you bring to the table. Make it concise, but valuable. Degree, School Name, School City, School State

Graduation Month, YEAR

TECHNICAL SKILLS

- Therapeutic Expertise:** list specific therapeutic areas that you may have expertise in separated by commas (good to highlight your expertise, especially if you're applying for fellowships within specific therapeutic areas; if not, it's also a good way to show your breadth of knowledge in therapeutic areas)
- Clinical Development:** list aspects of the clinical development process you have knowledge in, separated by commas to highlight that you know what you're talking about when it comes to the pharma industry, and that you know how to work individually
- Technology & Software:** list out software (MS Office, etc.) and programming languages you are both using
- Business Development:** list out any business-specific skills you have, such as sales, marketing, etc. (seeking help in the pharma industry)
- Soft Skills:** list out all the soft skills you want to mention, separated by commas (again a great way to highlight your soft skills and connect them)

Melting the ice: Engaging and educational ice-breaker activities for every learning session Jen Schneider, 2023-04-14 The first five minutes of a classroom experience are critical. The tone set in a session's opening minutes can significantly impact and influence in both positive and negative ways the quality and nature of the subsequent learning experience. How students spend that time can also have a positive impact on their learning in both the short and long term. When the opening minutes of a class are approached as an opportunity to build student connections, collaboration, and community, all learners benefit. As more and more learning experiences occur in synchronous and asynchronous online learning environments, strategies that both welcome students to online sessions and support student learning are increasingly important. Traditional ice breakers, while typically shared with a goal of building community and student engagement, can sometimes have unintended or even negative consequences on students. This text shares a collection of powerful opening activities that are designed to simultaneously engage students, build safe and connected classroom communities, and support student learning. All strategies are easily adapted and personalized to fit individual course and content needs, including face-to-face, synchronous online, and asynchronous online learning contexts. Shared activities are aligned with associated learning science research and incorporate strategies that have been shown to support student engagement and learning, such as retrieval practice, active recall, spaced practice, and interleaving, among other evidence.
