**Android for Programmers** Paul J. Deitel, Harvey Deitel, Abbey Deitel, 2013-12-30 The professional programmer's Deitel guide to smartphone and tablet app development using Android 4.3 and 4.4, the Eclipse-based Android Development Tools, and the new Android Studio. Billions of apps have been downloaded from Google Play. This book gives you everything you'll need to start developing great Android apps quickly and getting them published on Google Play. The book uses an app-driven approach: each new technology is discussed in the context of seven fully tested Android apps, complete with syntax coloring, code highlighting, code walkthroughs, and sample outputs. Apps you'll develop include Welcome App, Cannon Game, Tip Calculator, Doodlz, Twitter Searches, Address Book, Flag Quiz. The first generation Android phones were released in October 2008. By October 2013, a Strategy Analytics report showed that Android had 81.3% of the global smartphone market share, compared to 13.4% for Apple, 4.1% for Microsoft, and 1% for BlackBerry. Billions of apps have been downloaded from Google Play. There are now more than one billion activated Android devices worldwide, and more than 1.5 million Android devices are being activated daily. [venturebeat.com/2013/09/03/android-hits-1-billion-activations/](http://venturebeat.com/2013/09/03/android-hits-1-billion-activations/) and will be called KitKat in the next version. The opportunities for Android app developers are enormous. This book presents leading-edge computing technologies for professional software developers. At the heart of the book is the Deitel app-driven approach: concepts are presented in the context of complete working Android apps rather than using code snippets. The introduction and app test drives at the beginning of each chapter show one or more sample executions. The book's source code is available at [www.deitel.com/books/androidfp2](http://www.deitel.com/books/androidfp2). The apps in this book were carefully designed to introduce you to key Android features and APIs. You'll quickly learn everything you need to start building Android apps, beginning with a test drive of the Doodlz app in Chapter 1, then building your first app in Chapter 2. By the time you reach Chapter 9, you'll be ready to create your own apps for submission to Google Play and other app marketplaces. You'll master the Google Play
