**American Universities in a Global Market** Charles T. Clotfelter, 2010-04-28 In higher education the United States is the preeminent global leader dominating the list of the world's top research universities. But there are signs that America's position of global leadership will face challenges in the future as it has in other realms of international competition. *American Universities in a Global Market* addresses the variety of issues crucial to understanding this preeminence and this challenge. The book examines the various factors that contributed to America's success in higher education including openness to people and ideas, generous governmental support, and a tradition of decentralized, friendly competition. It also explores the advantages of holding a dominant position in this marketplace and examines the current state of American higher education in a comparative context, placing particular emphasis on how market forces affect universities. By discussing the differences in quality among students and institutions around the world, this volume sheds light on the singular aspects of American higher education.

**World University Rankings and the Future of Higher Education** Downing, Kevin, Ganotice, Jr., Fraide A., 2016-10-06 Delivering quality education to students while remaining competitive at an international level is only one of the many challenges universities face today. **Rethinking International Skilled Migration** Micheline van Riemsdijk, Qingfang Wang, 2016-10-04 In today's global knowledge economy, competition for the best and brightest workers has intensified. Highly skilled workers are an asset to companies, knowledge institutions, cities, and regions as they contribute to knowledge creation, innovation, and economic growth and development. Skilled migrants cross and many times straddle international borders to pursue professional opportunities. These spatial relocations provide opportunities and challenges for migrants and the cities and regions they inhabit. How have international skilled migratory flows been formed, sustained, and transformed over multiple spaces and scales? How have these processes affected cities and regions? And how have multiple stakeholders responded to these processes? The contributors to this book bring together perspectives from economic, social, urban, and population geography in order to address these questions from a myriad of angles. Empirical case studies from different regions illuminate the multiscaled processes of international skilled migration. In particular, the contributions rethink skilled migration theories and provide insights into the experiences of highly skilled labor migrants and international students, issues related to transnational activities and return migration, and policy implications for both immigrant source and destination countries. It also charts a future research agenda for international skilled migration.

research Rethinking International Skilled Migration provides a comparative perspective on the experiences of skilled migrants across the local regional national and or global scale paying particular attention to spatial and place based dimensions of international skilled migration It will be of interest to scholars and professionals in international migration regional and national development policymakers international businesses and NGOs
