Scientific Freedom Sebastian Porsdam Mann, Helle Porsdam, Maximilian M. Schmid, Péter Vilmos Treit, 2024-01-04 Scientists are supposed to have freedom to choose and conduct their experiments and exchange their ideas Known as scientific freedom this idea has been implicated in both wonderful and terrible scientific discoveries Although it is not new it has great relevance to contemporary society In a time of genetic editing global warming and a worldwide pandemic the question of how freely science is and should be conducted is one that has significant practical consequences Drawing on rigorous interdisciplinary methods this book defines the concept of scientific freedom tells its story and asks on what basis scientific freedom is best justified Based on international human rights law and philosophy the authors develop a model of scientific freedom as a constitutive element of the human right to enjoy the benefits of the progress of science and its applications To illustrate its usefulness they then test and apply this model to a real life and real time case study as well as to two highly important international human rights instruments

Proceedings of the 5th International Conference on AI Research Renata Paola Dameri, The International Conference on AI Research ICAIR is becoming a key forum for academics and students whether social scientists natural scientists or philosophers come together to explore the future of society in the context of AI Many aspects of AI are now the subject of peer reviewed academic research including the increasing use of Chatbots and GenAI in academe and in society at large The conference was initially launched in 2019 as the European Conference on Artificial Intelligence and Robotics After a success inaugural event in Oxford the conference fell victim to Covid and the following three years were held online Time was taken in 2023 to refocus this fast developing area of research and the name of the conference was changed this year to the International Conference on Artificial Intelligence The Proceedings of the 2025 edition of the conference include academic research papers PhD research papers Masters Research papers and work in progress papers all of which have been presented and discussed at

the ICAIR 2025 conference The proceedings are of an academic level appropriate to a professional research audience including graduates postgraduations doctoral and post doctoral researchers All papers have been double blind peer reviewed by members of the Review Committee Generative AI and Implications for Ethics, Security, and Data Management Gomathi Sankar, Jeganathan, David, Arokiaraj, 2024-08-21 As generative AI rapidly advances with the field of artificial intelligence its presence poses significant ethical security and data management challenges While this technology encourages innovation across various industries ethical concerns regarding the potential misuse of AI generated content for misinformation or manipulation may arise The risks of AI generated deepfakes and cyberattacks demand more research into effective security tactics The supervision of datasets required to train generative AI models raises questions about privacy consent and responsible data management As generative AI evolves further research into the complex issues regarding its potential is required to safeguard ethical values and security of people s data Generative AI and Implications for Ethics Security and Data Management explores the implications of generative AI across various industries who may use the tool for improved organizational development The security and data management benefits of generative AI are outlined while examining the topic within the lens of ethical and social impacts This book covers topics such as cybersecurity digital technology and cloud storage and is a useful resource for computer engineers IT professionals technicians sociologists healthcare workers researchers scientists and academicians **What Is the Point of Moral Philosophy?** Roger Crisp, Ingmar Persson, Julian Savulescu, 2025-07-16 Over the last half century moral philosophy has taken an applied turn covering practical issues in areas such as medicine business the environment and many others But it has largely failed to examine itself In this volume a range of distinguished contemporary ethicists representing many different positions examine what might be the point if any of moral philosophy Given the deep and apparently intransigent basic disagreements between philosophers is the discipline able to provide genuinely helpful advice Is there an agreed methodology for philosophical ethics Is the truth about ethics such that few people could believe it perhaps because the truth is so peculiar or act upon it because it turns out that ethics is much more demanding than most think Perhaps the only philosopher to have addressed these issues head on has been Ingmar Persson His important arguments provide a starting point for debate and are examined and discussed by several contributors But the volume goes beyond Persson s path breaking work to clarify the nature of the challenges to philosophical ethics and the variety of responses available What Is the Point of Moral Philosophy will be of interest to scholars and students working in all areas of moral philosophy including applied ethics metaethics and normative ethics Proceedings of TEEM 2023 José Alexandre de Carvalho Gonçalves, José Luís Sousa de Magalhães Lima, João Paulo Coelho, Francisco José García-Peñalvo, Alicia García-Holgado, 2024-08-04 This proceedings volume presents outstanding advances with a multidisciplinary perspective in the technological ecosystems that support Knowledge Society building and development With its learning technology based focus using a transversal approach TEEM is divided into thematic and highly
