

787 Dreamliner Integration Project

The Boeing 787 Dreamliner was the first commercial jet to be made of an advanced composite material – a combination of greater-level epoxy resin. A/C was another key project before using composite materials in the construction of aircraft. But the 787 combined two major composite systems from very different commercial aircraft families. This challenge allowed A/C to experience its own challenges, capabilities and limits in many different configurations (parts on the 787 with the Boeing Company, Wright Aircraft Industries, Global Aircrafts and Sport Aircrafts).
