Restoration of Breath Sreenath Nair, 2007-01-01 Breath is the flow of air between life and death Breathing is an involuntary action that functions as the basis of all human activities intellectual artistic emotional and physical Breathing is the first autonomous individual action that brings life into being and the end of breathing is the definitive sign of disappearance Starting from the question how breathing affects the body levels of consciousness perception and meaning this book for the first time investigates through a variety of philosophical critical and practical models directly and indirectly related to breath aiming to establish breath as a category in the production and reception of meaning within the context of theatre It also explores the epistemological psycho physical and consciousness related implications of breath Aristotle dedicated a volume to breath exploring and enquiring in to its presocratic roots For Heidegger breath is the temporal extension of Being Artaud s theatricality is not representational but rather rooted in the actor s breathing Jacques Derrida and Luce Irigaray investigate the phenomenon of breath in order to explain the nature of human consciousness Breath as a philosophical concept and as a system of practice is central to Indian thoughts performance medicine martial arts and spirituality As the book argues individual consciousness is a temporal experience and breath is the material presence of time in the body Cessation of breath on the contrary creates pause in this flow of the endless identification of signifiers When breath stops time stops When time stops there is a gap in the chain of the presence of signifiers and this gap is a different perceptual modality which is neutral in Zero velocity Restoration of Breath is a practical approach to this psychophysical experience of consciousness in which time exists only in eternity and void beyond memory and meaning
