Transactions on Engineering Technologies Sio-Iong Ao, Haeng Kon Kim, Mahyar A. Amouzegar, 2018-10-24 This volume contains a selection of revised and extended research articles written by prominent researchers participating in a large international conference on Advances in Engineering Technologies and Physical Science which was held in San Francisco, California, USA, October 25-27, 2017. Topics covered include engineering, mathematics, electrical engineering, communications systems, computer science, chemical engineering systems, engineering manufacturing, engineering and industrial applications. With contributions carefully chosen to represent the most cutting edge research presented during the conference, the book contains some of the state of the art in engineering technologies and the physical sciences and their applications and serves as a useful reference for researchers and graduate students working in these fields. **Rangelands: A Resource Under Siege** P. J. Joss, P. W. Lynch, O. B. Williams, 1986 This volume comprises the proceedings of the Second International Rangelands Congress held in Adelaide, Australia, in May 1984 and includes some 350 contributions drawn from 43 different countries. The Congress addressed the problem of the conflict between land users and the degradation of this valuable resource. Some 40% of the Earth's land surface is arid or alpine and therefore unsuitable for agricultural cultivation. Collectively, these lands are known as rangelands and in their natural state they constitute a habitat for grazing animals, both domestic and wild. Despite their low productivity, rangelands have been used for thousands of years as a source of food and fibre, but other uses such as mining, tourism, recreation, and conservation are exerting increasing demands. The result is often
