Awards 2024 Finalist Best New Nonfiction *Disruption and Digital Journalism* John V. Pavlik, 2021-10-06 This book offers a timely insight into how the news media have adapted to the digital transformation of public communication infrastructure. Providing a conceptual roadmap to understanding the disruptive innovative impact of digital networked journalism in the 21st century, the author critically examines how and to what extent news media around the world have engaged in digital adaptation. Making use of data from news media content production and distribution both off and online, as well as user and financial data from the U.S. and internationally, the book traces how the news media embraced and reacted to key developments such as the invention of the World Wide Web in 1989 and the launch of Google in 1998, Facebook in 2004, and the Apple iPhone in 2009. The author also highlights innovative organizations that have sought to reimagine news media that are optimized for digital online and mobile media of the 21st century, demonstrating how these groups have been able to stay better engaged with the public. *Disruption and Digital Journalism* is recommended reading for all academics and scholars with an interest in media, digital journalism studies, and technological innovation.

Interface between Regulation and Statistics in Drug Development Demissie Alemayehu, Birol Emir, Michael Gaffney, 2020-11-11 With the critical role of statistics in the design, conduct, analysis, and reporting of clinical trials or observational studies intended for regulatory purposes, numerous guidelines have been issued by regulatory authorities around the world focusing on statistical issues related to drug development. However, the available literature on this important topic is sporadic and often not readily accessible to drug developers or regulatory personnel. This book provides a systematic exposition of the interplay between the two disciplines, including emerging themes pertaining to the acceleration of the development of pharmaceutical medicines to serve patients with unmet needs. Features: Regulatory and statistical interactions throughout the drug development continuum; The critical role of the statistician in relation to the changing regulatory and healthcare landscapes; Statistical issues that commonly arise in the course of drug development and regulatory interactions; Trending topics in drug development with emphasis on current regulatory thinking and the associated challenges and opportunities. The book is designed to be accessible to readers with an intermediate knowledge of statistics and can be a useful resource to statisticians, medical researchers, and regulatory personnel in drug development, as well as graduate students in the health sciences. The authors' decades of experience in the pharmaceutical industry and academia, and extensive regulatory experience, comes through in the many examples throughout the book.
