Unlocking the Potential of OpenAI's ChatGPT DAVID YAO, Have you heard of OpenAI s ChatGPT but have no idea what it is or how to use it Look no further This book provides a comprehensive introduction to this revolutionary language model In this book the author takes you through the history of ChatGPT and its capabilities as well as its practical applications in fields such as customer service content creation and data analysis You ll also learn how ChatGPT works and what sets it apart from other language models But that s not all the book also provides hands on examples and tutorials to help you put your newfound knowledge into practice The author will also address the limitations of the model and provide tips on how to achieve optimal results Whether you re a data scientist business owner or student this book is a must read for anyone looking to understand and utilize the power of ChatGPT With its comprehensive understanding of ChatGPT and its potential to transform the way we work and learn this book is sure to be a valuable resource So why wait Get your hands on a copy today and let OpenAI s ChatGPT work for you

Design Thinking with Artificial Intelligence Daniel Graff, Mark A. Clark, Dan Li, Lei Xia, 2026-03-11 This book is a timely and valuable guide for innovators designers managers and students who want to boost their design thinking projects through leveraging artificial intelligence capabilities It offers over 40 traditional design thinking tools enhanced with AI Each AID tool is ready for use with specific step by step instructions that require little previous AI knowledge So if you would like to use AI to create a Critical Items Diagram deploy Explorative AI to AI Interviews build a Customer Journey Map engage in Rapid Prototyping or Create a Pitch there is a tool to support your project The book highlights how AI can support and enhance each phase of the design thinking process prepare it augments it Drawing on real world experiments they reveal how the future of creative work lies in a dynamic dialogue between human intuition and computational power This book is a manifesto for the next great leap in innovation a practical framework for unlocking human AI collaboration and building a future where imagination and computation work hand in hand Anna Phan UX Lead Monetization Google Most people think of design as a way to make things look better This book asks a deeper question what happens when design itself starts to think In *Design Thinking with Artificial Intelligence* Graff and his team show how AI doesn t replace creativity it reorganizes it Their experiments with students businesses and algorithms reveal something quietly revolutionary the future of innovation isn t man or machine but the conversation between them It s a manual for the next creative leap when intuition meets computation and imagination learns to collaborate Ling Fan Founder Tezign Founder d mix Lab This comprehensive thoughtful book masterfully lays out the foundations of Design Thinking and the immense potential of integrating AI to accelerate and improve any design process Packed with practical how to examples the authors demonstrate how to seamlessly weave AI into your existing workflow equipping you with powerful new tools and techniques for every step of the design process Most importantly the book proves how AI can augment not replace human innovation and creativity providing the knowledge to effectively upskill talented designers By putting design and human

creativity firmly at its core this is a foundational essential resource for anyone looking to enhance their creative edge in the age of AI John O Hara Design and Technology Leader Design Thinking with Artificial Intelligence is an essential guide for navigating the future of innovation This book provides a relevant framework for professionals and students to deploy effective human AI collaborations to solve complex problems and drive meaningful innovation Prof Yongqi LOU Honorary Doctor Royal College of Art President Shanghai University of Engineering Science Chaired Professor Tongji University This book arrives at a critical moment for leaders navigating the intersection of AI and human creativity True AI transformation in enterprises is not merely a technology challenge it s a human capital challenge Success depends on how effectively organizations can reimagine workflows empower teams and reskill their workforce to collaborate with intelligent systems By linking design thinking with AI this book offers a practical roadmap for making that collaboration real It s an essential guide for executives innovators and educators who believe the future of enterprise innovation lies in an AI human workforce Ranjan Dutta Founder Managing Partner ThothProAI Advisor on AI Transformation Human Capital and Workf

Generative AI-Driven Application Development with Java Satej Kumar Sahu,2026-01-01 This is the first hands on guide that takes you from a simple Hello LLM to production ready microservices all within the JVM You ll integrate hosted models such as OpenAI s GPT 4o run alternatives with Ollama or Jlama and embed them in Spring Boot or Quarkus apps for cloud or on pre deployment You ll learn how prompt engineering patterns Retrieval Augmented Generation RAG vector stores such as Pinecone and Milvus and agentic workflows come together to solve real business problems Robust test suites CI CD pipelines and security guardrails ensure your AI features reach production safely while detailed observability playbooks help you catch hallucinations before your users do You ll also explore DJL the future of machine learning in Java This book delivers runnable examples clean architectural diagrams and a GitHub repo you can clone on day one Whether you re modernizing a legacy platform or launching a green field service you ll have a roadmap for adding state of the art generative AI without abandoning the language and ecosystem you rely on What You Will Learn Establish generative AI and LLM foundations Integrate hosted or local models using Spring Boot Quarkus LangChain4j Spring AI OpenAI Ollama and Jlama Craft effective prompts and implement RAG with Pinecone or Milvus for context rich answers Build secure observable scalable AI microservices for cloud or on prem deployment Test outputs add guardrails and monitor performance of LLMs and applications Explore advanced patterns such as agentic workflows multimodal LLMs and practical image processing use cases Who This Book Is For Java developers architects DevOps engineers and technical leads who need to add AI features to new or existing enterprise systems Data scientists and educators will also appreciate the code first Java centric approach

Chair is Prof Florinda Matos and the Programme Chair is Prof Ivaro Rosa both from Iscte Business School Iscte Instituto Universit rio de Lisboa Portugal ECKM is now a well established event on the academic research calendar and now in its 24th year the key aim remains the opportunity for participants to share ideas and meet the people who hold them The scope of papers will ensure an interesting two days The subjects covered illustrate the wide range of topics that fall into this important and ever growing area of research The opening keynote presentation is given by Professor Leif Edvinsson on the topic of Intellectual Capital as a Missed Value The second day of the conference will open with an address by Professor Noboru Konno from Tama Graduate School and Keio University Japan who will talk about Society 5 0 Knowledge and Conceptual Capability and Professor Jay Liebowitz who will talk about Digital Transformation for the University of the Future With an initial submission of 350 abstracts after the double blind peer review process there are 184 Academic research papers 11 PhD research papers 1 Masters Research paper 4 Non Academic papers and 11 work in progress papers published in these Conference Proceedings These papers represent research from Australia Austria Brazil Bulgaria Canada Chile China Colombia Cyprus Czech Republic Denmark Finland France Germany Greece Hungary India Iran Iraq Ireland Israel Italy Japan Jordan Kazakhstan Kuwait Latvia Lithuania Malaysia M xico Morocco Netherlands Norway Palestine Peru Philippines Poland Portugal Romania South Africa Spain Sweden Switzerland Taiwan Thailand Tunisia UK United Arab Emirates and the USA

Introduction to Generative AI, Second Edition Numa Dhamani, 2026-01-13 Get up to speed quickly with generative AI AI tools like ChatGPT and Gemini automated coding tools like Cursor and Copilot and countless LLM powered agents have become a part of daily life They ve also spawned a storm of misinformation hype and doomsaying that makes it tough to understand exactly what Generative AI actually is and what it can really do Introduction to Generative AI Second Edition delivers a clearly written survey of generative AI fundamentals along with the techniques and strategies you need to use AI safely and effectively In this easy to read introduction you ll learn How large language models LLMs work How to apply AI across personal and professional work The social legal and policy landscape around generative AI Emerging trends like reasoning models and vibe coding Introduction to Generative AI Second Edition guides you from your first eye opening interaction with tools like ChatGPT to how AI tools can transform your personal and professional life safely and responsibly This second edition has been completely revised to reflect the latest developments in the field from the latest innovations in prompt engineering and AI agents to fresh coverage of multimodal training reasoning models no code tools retrieval augmented generation RAG and more About the book Introduction to Generative AI Second Edition is an up to date guide to the capabilities risks and limitations of tools like ChatGPT Gemini and Claude This easy to follow guide moves quickly through the basics giving you the skills and understanding to use AI with confidence Along the way you ll explore how AI is impacting even established industries with an expert level look at global investment in AI AI education policy AI s economic impact and the ongoing legal and ethical issues of AI usage About the reader For anyone interested in generative AI No

technical experience required About the author Numa Dhamani is a natural language processing expert working at the intersection of technology and society Maggie Engler is an engineer and researcher currently working on safety for large language models *Emerging Computer Technologies 2* Ömer Aydın,Radosveta Sokullu,Özkan Akın,Erginay Aslan,Oliver Simonoski,Ninoslav Marina,Natasa Paunkoska (Dimoska),Izabela Mitreska,Mustafa Ceyhan,Enis Karaarslan,2022-12-31 There is rapid development and change in the field of computer science today These affect all areas of life Emerging topics in computer science are covered in this book In the first chapter a specific IoT application called a smart mailbox with face recognition which uses cellular connectivity and image processing to securely deliver valuable documents The prototype for this system includes a fingerprint reader camera electromagnetic lock and various other components connected to an Arduino Uno and a Raspberry Pi and uses OpenCV and Python software for face detection and recognition In the second chapter authors compares and evaluates the main characteristics of 5G channels and the performance of two channel coding candidates low density parity check LDPC codes and polar codes The analysis considers block error rate bit error rate computational complexity and flexibility and finds that polar codes outperform LDPC code systems though LDPC is still a viable option compared to other code systems The third chapter focuses on how to reliably process and store DNA sequences in EHR systems without any modifications To achieve this the authors introduce a coding technique and evaluate its effectiveness using the Hamming code and Reed Solomon coding schemes on a sample data set The results show that the Reed Solomon coding scheme outperforms the Hamming code in terms of error detection and correction for securely processing DNA records to EHR systems The next chapter investigates the robustness of AI models trained on thyroid ultrasound images using different convolutional neural network CNN architectures VGG19 Xception ResNet50V2 and EfficientNetB2 against adversarial attacks using the fast gradient sign method FGSM basic iterative method BIM and projected gradient descent PGD techniques In the fifth chapter it was questioned whether artificial intelligence could write an academic article In this direction an academic article was created and evaluated by OpenAI ChatGPT The final chapter proposes an application to measure RF signal intensities in urban areas and use that information to estimate the amount of energy that can be harvested from these signals This information is then presented to users through a geographical information system **El imperio de la IA** Karen Hao,2025-11-26 La fascinante historia de OpenAI y ChatGPT y del catastrófico destino al que nos pueden conducir Con un acceso privilegiado a las personas más cercanas a Sam Altman líder de OpenAI Karen Hao descubre como esta organización se ha convertido en el epicentro de una industria tecnológica con poder y recursos sin precedentes As narra su frenética culminación en el sector y expone las enormes tensiones sociales y medioambientales que esta nueva era está generando **OpenAI Solutions** Ashok Brardwaj,2024-03-13 Unlock the power of OpenAI and transform your ideas into intelligent applications with OpenAI Solutions Transforming Ideas into Intelligent Applications This comprehensive guide offers practical insights and strategies for leveraging OpenAI's innovative

technologies to build intelligent applications that drive business value Whether you re a developer entrepreneur or business leader this book provides actionable guidance on how to identify opportunities design solutions and deploy applications using OpenAI s APIs and tools From natural language processing to computer vision each chapter explores real world use cases and best practices for integrating OpenAI into your projects With step by step instructions and practical examples you ll learn how to harness the full potential of OpenAI and unlock new opportunities for innovation and growth *The Bedford*

Deep Learning with JAX Grigory Sapunov,2024-12-03 Accelerate deep learning and other number intensive tasks with JAX Google s awesome high performance numerical computing library The JAX numerical computing library tackles the core performance challenges at the heart of deep learning and other scientific computing tasks By combining Google s Accelerated Linear Algebra platform XLA with a hyper optimized version of NumPy and a variety of other high performance features JAX delivers a huge performance boost in low level computations and transformations In Deep Learning with JAX you will learn how to Use JAX for numerical calculations Build differentiable models with JAX primitives Run distributed and parallelized computations with JAX Use high level neural network libraries such as Flax Leverage libraries and modules from the JAX ecosystem Deep Learning with JAX is a hands on guide to using JAX for deep learning and other mathematically intensive applications Google Developer Expert Grigory Sapunov steadily builds your understanding of JAX s concepts The engaging examples introduce the fundamental concepts on which JAX relies and then show you how to apply them to real world tasks You ll learn how to use JAX s ecosystem of high level libraries and modules and also how to combine TensorFlow and PyTorch with JAX for data loading and deployment About the technology Google s JAX offers a fresh vision for deep learning This powerful library gives you fine control over low level processes like gradient calculations delivering fast and efficient model training and inference especially on large datasets JAX has transformed how research scientists approach deep learning Now boasting a robust ecosystem of tools and libraries JAX makes evolutionary computations federated learning and other performance sensitive tasks approachable for all types of applications About the book Deep Learning with JAX teaches you to build effective neural networks with JAX In this example rich book you ll discover how JAX s unique features help you tackle important deep learning performance challenges like distributing computations across a cluster of TPUs You ll put the library into action as you create an image classification tool an image filter application and other realistic projects The nicely annotated code listings demonstrate how JAX s functional programming mindset improves composability and parallelization What s inside Use JAX for numerical calculations Build differentiable models with JAX primitives Run distributed and parallelized computations with JAX Use high level neural network libraries such as Flax About the reader For intermediate Python programmers who are familiar with deep learning

About the author Grigory Sapunov holds a Ph D in artificial intelligence and is a Google Developer Expert in Machine Learning The technical editor on this book was Nicholas McGreivy Table of Contents Part 1 1 When and why to use JAX 2 Your first program in JAX Part 2 3 Working with arrays 4 Calculating gradients 5 Compiling your code 6 Vectorizing your code 7 Parallelizing your computations 8 Using tensor sharding 9 Random numbers in JAX 10 Working with pytrees Part 3 11 Higher level neural network libraries 12 Other members of the JAX ecosystem A Installing JAX B Using Google Colab C Using Google Cloud TPUs D Experimental parallelization

The Rise of Generative AI. Applications, Challenges, and Ethical Implications Fatlind Mazreku, 2025-12-10 Scientific Study from the year 2025 in the subject Computer Sciences Artificial Intelligence language English abstract Generative Artificial Intelligence AI refers to algorithms and models capable of producing new content such as text images music or code that mimics or even rivals human creations Recent breakthroughs in model architectures e g transformers and the advent of large scale models like OpenAI s GPT 3 and DALL E have fueled an explosive growth in generative AI s capabilities and public adoption This paper provides an overview of generative AI s rise and its transformative impact across various fields We discuss key applications of generative AI in domains ranging from art and design to software development and medicine highlighting the innovative benefits it brings such as enhanced creative productivity and new problem solving tools At the same time we examine the challenges and ethical concerns emerging from generative AI s widespread use issues of bias misinformation intellectual property and misuse that have become increasingly urgent We also analyze the current technical limitations of generative AI including accuracy interpretability and resource demands and consider future outlooks for the technology The findings underscore that while generative AI offers unprecedented opportunities and innovations careful consideration of its ethical implications and proactive governance is essential to ensure it is developed and used responsibly In conclusion generative AI stands as a powerful tool that is reshaping creativity industry and society and its continued evolution will depend on balancing its benefits with diligent management of its risks

The Wealth Habit Ken Okoroafor and Mary Okoroafor, 2026-03-19 The Wealth Habit shows how small well designed behaviours repeated consistently create extraordinary financial outcomes over time Steven Bartlett The Diary of a CEO Wealth doesn t start with money it starts with a habit Most people think that wealth is reserved for the lucky few those born into privilege gifted with an entrepreneurial streak or naturally skilled with money But the truth is financial success isn t about luck it s about habits The Wealth Habit is a groundbreaking behaviour driven approach to wealth building that rewires the way you think about money turning financial success into a series of tiny effortless repeatable actions Instead of overwhelming readers with rigid budgets or complex investment strategies this book reveals how small daily financial moves compound into life changing wealth no matter where you start Whether you re struggling with money looking to break free from the paycheck to paycheck cycle or searching for a stress free automated way to build wealth this book gives you a clear habit based roadmap to make financial success inevitable Start small Repeat often Let the habit lead the

way *Co-Intelligence* Ethan Mollick, 2024-04-02 AN INSTANT NEW YORK TIMES BESTSELLER From Wharton professor and author of the popular One Useful Thing Substack newsletter Ethan Mollick comes the definitive playbook for working learning and living in the new age of AI Something new entered our world in November 2022 the first general purpose AI that could pass for a human and do the kinds of creative innovative work that only humans could do previously Wharton professor Ethan Mollick immediately understood what ChatGPT meant after millions of years on our own humans had developed a kind of co intelligence that could augment or even replace human thinking Through his writing speaking and teaching Mollick has become one of the most prominent and provocative explainers of AI focusing on the practical aspects of how these new tools for thought can transform our world In *Co Intelligence* Mollick urges us to engage with AI as co worker co teacher and coach He assesses its profound impact on business and education using dozens of real time examples of AI in action *Co Intelligence* shows what it means to think and work together with smart machines and why it s imperative that we master that skill Mollick challenges us to utilize AI s enormous power without losing our identity to learn from it without being misled and to harness its gifts to create a better human future Wide ranging hugely thought provoking optimistic and lucid *Co Intelligence* reveals the promise and power of this new era **The Tao of Fundraising** John Kim, 2026-03-17 A masterclass in persuasion performance and psychology *The Tao of Fundraising* reveals how to navigate the invisible forces of human nature and capital flow to transform great ideas into fully funded ventures *The Tao of Fundraising* delivers a blunt but necessary truth the best ideas often go unfunded not because they re bad but because their creators don t understand how capital flows Fundraising is the most neglected art in modern business Most MBA courses and coaching advice focus on what to do after a business has secured investment *The Tao of Fundraising* seeks to fill that void No one understands fundraising like John Kim who has used these concepts to raise more than 70 billion over the course of his career Here he lays out all the concepts that allowed him to rise to the top of the fundraising world One part how to one part psychological study and one part spiritual guide *The Tao* breaks down the fundraising process and all the skills necessary to convince skeptical investors to place their money in your business To overcome a system designed to keep money out of reach and the natural hesitancy of investors you need *The* conceptual frameworks to understand how fundraising works in practice *The* practical processes that allow a fundraiser to sell their investment *The* psychological principles that enable a fundraiser to persuade skeptical investors to ignore their fears and trust the investment *The* performance skills to close the deal Drawing from ancient philosophy modern psychology economics and decades of frontline experience Kim reveals the deeper dynamics that drive fundraising at the highest level This isn t just a book about money it s a masterclass in human nature and the invisible forces that separate good ideas from funded ones *Marketing* Roger A. Kerin, Steven W.
