dramatic scenes of battles and intrigue with colorful legends and reflections on the nature of politics Sayrami wrote not only to record events being lost from memory three decades after the uprising but also to account for why the Islamic rebellion had failed He draws on traditional Islamic scholarship to analyze the relationship between Qing and Islamic power developing an incisive argument about politics and empire Presenting a distinctly Uyghur perspective on China Eurasia and the world the *Tarikh i amidi* is at once an invaluable lens on a period of flux and a cornerstone of Uyghur writing

Grammaticalization meets Construction Grammar Evie Coussé, Peter Andersson, Joel Olofsson, 2018-05-23

Grammaticalization research has increasingly highlighted the notion of constructions in the last decade In the wake of this heightened interest efforts have been made in grammaticalization research to more precisely articulate the largely pretheoretical notion of construction in the theoretical framework of construction grammar As such grammaticalization research increasingly interacts and converges with the emerging field of diachronic construction grammar This volume brings together articles that are situated at the intersection of grammaticalization research and diachronic construction grammar All articles share an interest in integrating insights from grammaticalization research and construction grammar in order to advance our understanding of empirical cases of grammaticalization Constructions at various levels of abstractness are investigated both in well documented languages such as Ancient Greek Latin Spanish German Norwegian and English and in less described languages such as Manchu and Mongolian *The Comprehensive Standard Dictionary of the English Language* Funk & Wagnalls Company, 1921 Man and Nature in the Altaic World. Barbara Kellner-Heinkele, Brigitte Heuer, Elena V. Boykova, 2020-08-10 No detailed description available for Man and Nature in the Altaic World A Guide to World Language Dictionaries Andrew Dalby, 1998 This single volume reference offers a practical evaluative guide to the main general dictionaries of the world s languages It provides selective critical annotations to help users choose the most appropriate dictionary for their purpose The survey covers 275 languages with a written literature and indicates the best source of word histories and best grammars Language Richard VanNess Simmons, Newell Ann Van Auken, 2014 *A Chinese-English Dictionary* Herbert Allen Giles, 1912 **Dictionary of Dictionaries and Eminent Encyclopedias** Thomas Kabdebo, Neil Armstrong, 1997 Enlarged by some 50 percent and equipped with more comprehensive name and subject indexes the second edition of this unique guide contains bibliographic and descriptive annotations for 8 000 dictionaries It features 1 500 additional bilingual works 400 new subject categories and all the major electronic dictionaries produced in English While the primary emphasis is on language dictionaries subject dictionaries on topics as varied as ceramics bookbinding and theatre as well as dictionaries issued by international bodies and agencies are included Covering all the world s languages works may be bilingual monolingual or multilingual as long as there is an English element “Language” Language Hāmd Allāh Mustawfī Qazvīnī, 1928 Language George Melville Bolling, Bernard Bloch, 2002 Proceedings of the annual meeting of the Society in v 1 11 1925 34 After 1934 they appear in Its Bulletin **The World's Languages:**

**Grammars, Dictionaries; General, Specialized, Scientific, Technical** Stechert-Hafner, Inc,1960      Multilingualism, Lingua Franca and Lingua Sacra Jens E. Braarvig,Markham J. Geller,2018 The present book comprises a number of studies centered around the topic of how knowledge diffuses from one culture to another and how knowledge diffusion is connected with the spread of languages and the conceptual systems they carry by translation This diffusion also takes place also over linguistic borders in the way that a given receiving language may also absorb systems of knowledge from languages that are linguistically quite unrelated but culturally connected with respect to knowledge transfer Thus we find that Sumerian concepts with considerable impact were moved into the Akkadian language along with writing systems religion science and literature even though linguistically the languages are completely unrelated Another example is how Chinese culture and writing systems spread throughout East Asia into Korea Japan and Vietnam though the languages of these countries were linguistically unrelated to Chinese The same case can be made for Buddhist ways of thinking when it was clothed in the garb of Chinese or Tibetan or one of the other languages along the Silk Road This is also true for the spread of Manicheism as it was portrayed in a great number of languages related or unrelated German and Latin are linguistically related but when Latin learning was communicated in Old High German many of its terms were created in Middle German to accommodate the Latin conceptual world and the German language was lastingly enriched with novisms denoting concepts of the Classical traditions of learning in a process parallel to the spread of Greek Christianity into the East European cultures and languages The book describes some cases of such knowledge transfer and what kind of mechanisms are involved in the ensuing language changes in the receiving languages and cultures      Bulletin of the School of Oriental Studies, London Institution University of London.
