Joel Waldfogel, 2020-12-08 How digital technology is upending the traditional creative industries and why that's a good thing
The digital revolution poses a mortal threat to the major creative industries: music, publishing, television, and the movies.

In *Digital Renaissance*, Joel Waldfogel argues that digital technology is enabling a new golden age of popular culture, a digital renaissance. Analyzing decades of production and sales data, as well as bestseller and best-of lists, Waldfogel finds that the new digital model is just as powerful at generating high-quality, successful work as the old industry model, and in many cases, more so.
