Fashion Business and Digital Transformation Charlene Gallery, Jo Conlon, 2024-06-28 Fashion Business and Digital Transformation provides a practical and holistic overview of the fashion industry and the key technologies impacting the fashion supply chain. It covers product design and development, production, sales, and customer experiences in physical, online, and virtual environments. The key technologies impacting the ecosystem are explored, including artificial intelligence, virtual reality, augmented reality, digital fashion design, NFTs, 3D textiles, and blockchain. Strategic concepts such as retailtainment, phygital, gamification, and e-commerce are analysed alongside the effect of these key strategies for both the retailer and the customer. Theoretical foundations are supported by extensive use of examples, interviews, and case studies drawn from a wide range of global fashion disruptors and cutting-edge brands. Engaging activities, exercises, and technical step-by-step guides are incorporated throughout, which will both consolidate how technology is driving change in the industry but also equip the reader with the key skills and digital literacy capabilities required by future practitioners. Online resources include chapter-by-chapter PowerPoint slides, a test bank, and links to further resources. This examination of the digital transformation of the fashion industry will be essential reading for advanced undergraduate and postgraduate students of Fashion Management, Fashion Business, and Fashion Technology.

**Digital Marketing. A Case Study of Adidas and Snapchat** Ricardo Escoda, 2018-08-28 Case Study from the year 2018 in the subject Business economics. Offline Marketing and Online Marketing grade 1-3 International School of Management Campus Munich language English abstract. Since market power has moved from enterprises to consumers and global competition has increased substantially, managers in almost all industries need to face enormous performance challenges. To avoid being replaced by rivals, they are forced to be more innovative in establishing and performing their competitive strategies. Long-term success will not be achieved solely through competitiveness but instead will depend on the ability to evolve, new demand, and create and gather new markets. Therefore, marketing is one of the most fundamental topics when concentrating on the customer's desires. Mainly, it is about picking up the clients by delivering a unique feeling in form of a must-have product. Adidas is counted among one of the global players of sports and lifestyle brands together with its biggest competitors Nike and Puma. With an annual revenue of EUR 21.218bn in 2017, over 56,888 employees worldwide, and more than 900 million products produced per year, the German business is an omnipresent sports and lifestyle brand which became more and more important over the last decades. According to Statista, it was voted one of the ten most reputable companies worldwide in 2018, being the only sports and lifestyle brand in this ranking. In addition, Forbes published an article stating that Adidas reached the third place of the World's most valuable sports brands following Nike and ESPN. Yet, by comparing the global revenues of Adidas, Nike, and Puma from 2006 to 2017, it can be seen that the company founded in 1924

by Adi Dassler in a small village in Southern Germany called Herzogenaurach is lagging behind Nike's global revenues for many years. This is one of the core reasons driving the brand with the three stripes to establish new marketing strategies for diversifying and simultaneously increasing its customer portfolio. The sections below concern aspects referring to the research fields E Marketing and E Commerce Online Marketing Online Advertising and Social Media and Mobile Marketing. A summary with the most fundamental information is provided at the end of each part.

*Connected Teaching* Harriet L. Schwartz, 2023-07-03. At a time when many aspects of the faculty role are in question, Harriet Schwartz, the author of *Connected Teaching*, argues that the role of teachers is as important as ever and is evolving profoundly. She believes the relationships faculty have with individual students and with classes and cohorts are the essential driver of teaching and learning. This book explores teaching as a relational practice, a practice wherein connection and disconnection with students, power, identity, and emotion shape the teaching and learning endeavor. The author describes moments of energetic, deep learning and what makes these powerful moments happen. She calls on readers to be open to and seek relationship, understand their own socio-cultural identity, and how this shapes internal experience and the ways in which they are met in the world, and vigilantly explore and recognize emotion in the teaching endeavor. *Connected Teaching* is informed and inspired by Relational Cultural Theory (RCT). The premise of RCT is that the experience of engaging in growth-fostering interactions and relationships is essential to human development. RCT's founding scholars believed the theory would be relevant in many different settings, but this is the first book to apply them to teaching and learning in higher education. In this book, the author shows that RCT has much to offer those devoted to student learning and development, providing a foundation from which to understand the transformative potential of teaching as a relational practice.
