International Perspectives of Generative AI in Education Guy Tchiboza, 2025-12-10. This book examines the ongoing emergence of generative artificial intelligence (GenAI) in education. It focuses both on the potential and effects of GenAI and on its limitations, risks, and challenges. Particular emphasis is placed on the impact that GenAI has on pedagogy and knowledge assessment across a range of educational fields and disciplines, as well as on teacher preparation, development, productivity, and workload. While artificial intelligence has gradually penetrated the field of education over the last 30 years, the emergence of GenAI, which we are now witnessing, is changing the game. From a perspective that transcends national specificities, the analyses address all levels of education, as well as the development of education policies. In terms of epistemology and methodology, the work draws on a variety of research frameworks: theoretical, conceptual, empirical, and methodologies including qualitative, quantitative, and mixed methods research. This work offers a series of suggestions and recommendations, as well as avenues for future research, in a range of areas including AI/GenAI literacy, teacher preparation and development, curriculum updating, pedagogy, knowledge assessment, teacher effectiveness, learner development, education policy, and ethics. It also warns of the risks posed by GenAI, particularly in terms of deskilling, breaches of data privacy, and research integrity, bias, social justice, ecological sustainability, and loss of meaning of the teaching profession.

Advancing the Frontiers of Education, Science and Technology in Nigeria Olukoya Ogen, Bankole Faloye, 2025-07-23. Document from the year 2025 in the subject Education Reading Instruction language English abstract. The book *Expanding the Frontiers of Education: Science and Technology in Nigeria* explores the transformative impact of digital technologies on learning, scientific discovery, and technological advancement. With 67 painstakingly peer-reviewed chapters, the book delves into how technologies are reshaping traditional educational models, driving scientific innovation, and creating new opportunities for progress in a rapidly evolving digital landscape. The volume is more than a collection of academic essays; it offers a holistic view of how knowledge can be harnessed for societal transformation, reflecting the depth and breadth of Professor Adeoluwa's scholarly legacy.

Professor Bayode POPOOLA, Vice Chancellor, Adeyemi Federal University of Education, Ondo. This monumental edited collection is a fitting tribute to Professor Adeoluwa's exceptional scholarship and administrative prowess. It underscores the critical need for integrating digital technologies with human-centered approaches and highlights the value of cross-disciplinary collaboration while addressing the ethical dimensions of technological advancement. The book offers a comprehensive roadmap for navigating the complexities and opportunities of the digital age. It provides essential insights for educators, scientists, technologists, policy makers, and all those interested in shaping the future of learning, research, and
