Computer-Aided Decision Analysis Stuart S. Nagel, 1993-06-30 The essence of decision aiding software is that it consists of various forms of microcomputer programming designed to enable users to process a set of 1 goals to be achieved 2 alternatives available for achieving them and 3 relations between goals and alternatives in order to choose the

best alternative combination allocation or predictive decision rule Benefits from using decision aiding software include 1 being more explicit about goals to be achieved alternatives available for achieving them and relations between goals and alternatives 2 being stimulated to think of more goals alternatives and relations than one would otherwise be likely to do 3 being prepared to handle multiple goals alternatives and relations without getting confused and without feeling the need to resort to a single composite goal or a single go no go alternative 4 being encouraged to experiment with changes in the inputs into one's thinking to see how one's conclusions are affected and 5 being better able to achieve or exceed one's goals when choosing among alternatives or allocating scarce resources There are five parts to the book covering 1 a broad overview of decision aiding packages including criteria for evaluating them 2 approaches that are based on management science and operations research including linear programming and decision trees 3 spreadsheet based software generally with goals on the columns alternatives on the rows relations in the cells overall totals for each alternative at the far right and a capability for indicating how the totals would be altered as a result of changes in the inputs 4 expert systems software including rule based and knowledge based expert systems and 5 general applications of decision aiding software and a discussion of the increasing utilization of such software
