**Digital Organizations - Leadership Disrupted**  
Ganesh Shermom, 2016-12-08 Discover the Digital Organization. We think of organizations as an amorphous large complex institutions. True but organizations are also symbols of its people who aspired, nurtured and struggled away to make it work, not to forget its collection of stories, rituals, episodes, values, experiences that can be broadly summarized and called as the culture. And the ethics that their organizations display today and in times to come. Organizations are products of a leader's imagination. It takes the shape of that dream. And in that dream, good or bad, lies its destiny. Leadership is disrupted owing to digital influences in technology, knowledge, millennial mindset, people attitudes, skills, behaviors, rapid changes in customer needs, speed and agility, flexible structures, dynamic creative designs, unique people actions, expectations and deliverance, talent issues, business climate, HR programs, work values and business ethics, all displayed as culture. A Digital Mind Set all about Leadership.

**The Tubular Thermosyphon**  
G. S. H. Lock, 1992 The tubular thermosyphon is a very simple idea for transferring heat. The device has many uses from cooling equipment and machinery to recovering waste heat.

recovery and conserving energy However the actual operating details of the thermosyphon are more complex and change dramatically with the circumstances The length and diameter of the tube the nature and state of the fluid the strength and variation of the body force field all influence the internal circulation pattern and thus create different operating characteristics This book deals with each of these variations thoroughly and systematically Emphasis is placed on the physical principles underlying thermal behavior under single phase or evaporative conditions whether the tube is stationary or rotating and whether it is straight or bent Consideration is also given to other devices having a similar purpose This study will be of special interest to mechanical chemical electrical and geotechnical engineers and graduate students concerned with thermosyphon technology
