**Leadership 2.0 in processes of a sustainable change** Prof. Dr. Michael Kurwan,2025-06-30 Document from the year 2025 in the subject Leadership and Human Resources Leadership language English abstract In order to successfully implement sustainable changes in a company in the context of change processes strong leadership is required at the top of a company which should have a great deal of empathy and a sure instinct in order to position the company in the market in the long term and profitably In order to successfully shape these sustainable changes it will not be the famous power of the leader of the past but will only work with the involvement of employees in the new world of work in the knowledge age which is characterized by digitalization and artificial intelligence This new form of leadership is also referred to as Leadership 2 0 in which it is important to retain top performers and in particular key personnel in the company in the long term which is a very challenging leadership task in HR management In change processes a fundamental distinction must be made between incremental change management and radical change management While incremental change takes place continuously and is integrated into everyday working life radical change represents a strategic realignment of the company which is largely associated with staff reductions and is intended to change the corporate culture This is particularly true in the case of restructuring where cost cutting programs play a decisive role in ensuring the long term survival of the company Employees are more willing to go along with incremental change also known as continuous improvement than radical change as they could also be affected by staff cuts This fuels employees fears and therefore often leads to high staff turnover *United States Circuit Courts of Appeals Reports* ,1911 United States of America V. **Intelligenza artificiale** Gianluca Massini Rosati, 2026-03-17 L'intelligenza artificiale sta entrando negli studi professionali e nelle aziende con la promessa di semplificare e velocizzare Ma nel fisco la semplificazione spesso la scorciatoia piú pericolosa Intelligenza artificiale il vademecum che ogni commercialista e imprenditore dovrebbe leggere prima di affidare le proprie decisioni a un algoritmo Gianluca Massini Rosati dopo oltre dieci anni di sperimentazione reale nella fiscalità delle PMI italiane smonta il mito dell'AI onnipotente applicata alla consulenza fiscale e alla gestione d'impresa mostrando cosa succede quando algoritmi generalisti vengono usati come oracoli in un ambito dove l'errore non teorico ma economico legale e reputazionale Eppure l'AI puó diventare un'alleata potentissima se inserita in processi solidi e sotto una supervisione umana competente L'autore attraverso esempi concreti e soluzioni strategiche spiega come costruire un modello AI Human capace di aumentare efficienza controllo di gestione e risparmio fiscale senza trasformarsi in una bomba a orologeria Un paradigma in cui la tecnologia non semplifica la complessità ma aiuta a governarla rendendo imprese e consulenti davvero piú forti consapevoli e fiscalmente inattaccabili
