Connected in Isolation Eszter Hargittai, 2022-12-20 What life during lockdown reveals about digital inequality The vast majority of people in wealthy highly connected or digitally privileged societies may have crossed the digital divide but being online does not mean that everyone is equally connected and digital inequality reflects experience both online and off In *Connected in Isolation* Eszter Hargittai looks at how this digital disparity played out during the unprecedented isolation imposed in the early days of the coronavirus pandemic During initial COVID 19 lockdowns the Internet for many became a lifeline as everything from family get togethers to doctor s visits moved online Using survey data collected in April and May of 2020 in the United States Italy and Switzerland Hargittai explores how people from varied backgrounds and differing skill levels were able to take advantage of digital media to find the crucial information they needed to help loved ones procure necessities understand rules and risks Her study reveals the extent to which long standing social and digital inequalities played a critical role in this move toward computer mediated communication and were often exacerbated in the process However Hargittai notes context matters her findings reveal that some populations traditionally disadvantaged with technology such as older people actually did better than others in part because of the continuing importance of traditional media television in particular The pandemic has permanently shifted how reliant we are upon online information and the implications of Hargittai s groundbreaking comparative research go far beyond the pandemic *Connected in Isolation* informs and expands our understanding of digital media including how they might mitigate or worsen existing social disparities whom they empower or disenfranchise and how we can identify and expand the skills people bring to them

The Routledge Handbook on the American Dream Robert Hauhart, Mitja Sardoč, Tomaž Deželan, 2025-12-18

The Routledge Handbook on the American Dream Volume 3 explores the social economic and cultural aspects of the American Dream in both theory and reality in the twenty first century This collection of essays brings together leading scholars from a range of fields to further develop the themes and issues explored in the previous two volumes The concept of the American Dream first expounded by James Truslow Adams in The Epic of America in 1931 is at once both ubiquitous and difficult to define The term perfectly captures the hopes of freedom opportunity and upward social mobility invested in the nation However the American Dream appears increasingly illusory in the face of widening inequality and apparent lack of opportunity particularly for the poor and ethnic or otherwise marginalized minorities in the United States As such an understanding of the American Dream through both theoretical analyses and empirical studies whether qualitative or quantitative is crucial to understanding contemporary America Like the previous volumes of The Routledge Handbook on the American Dream this collection will be of great interest to students and researchers in a range of fields in the humanities and social sciences

Quantified Storytelling Alex Georgakopoulou, Stefan Iversen, Carsten Stage, 2020-11-06 This book interrogates the role of quantification in stories on social media how do visible numbers e g of views shares likes and invisible algorithmic measurements shape the stories we post and engage with The links of quantification with stories have not been explored sufficiently in storytelling research or in social media studies despite the fact that platforms have been integrating sophisticated metrics into developing facilities for sharing stories with a massive appeal to ordinary users influencers and businesses alike With case studies from Instagram Reddit and Snapchat the authors show how three types of metrics namely content metrics interface metrics and algorithmic metrics affect the ways in which cancer patients share their experiences the circulation of specific stories that mobilize

counter publics and the design of stories as facilities on platforms The analyses document how numbers structure elements in stories indicate and produce engagement and become resources for the tellers self presentation This book will be of interest to students and scholars working in the fields of narrative and social media studies including narratology biography studies digital storytelling life writing narrative psychology sociological approaches to narrative discourse and sociolinguistic perspectives
