Farrell,2022-05-19 This Element examines the concept of reflective practice in language teaching It includes a brief description of what reflective practice is and how it is operationalized by two of its main protagonists John Dewey and Donald Sch n as well as some of the limitations of their conceptions This is used as an introduction to how the author further developed their conceptions when operationalizing reflective practice for language teachers through a five stage framework for reflecting on practice for language teachers The author then presents an in depth case study of the reflections of an English as a Foreign Language EFL teacher working in Costa Rica as he moved through the five stages of the framework for reflecting on practice The author then goes on to outline and discuss how reflective practice may be moved forward and calls

attention to the importance of emotions in the process of reflection for language teachers *Reflective Teaching* Andrew Pollard, 2008-05-08 *Reflective Teaching* is the definitive textbook for reflective classroom professionalism. It offers exceptional support for trainee teachers, mentors, newly qualified teachers, and for those engaged in continuing professional development and performance review. Andrew Pollard's *Reflective Teaching* has been established for over twenty years. Each edition builds on that foundation and offers something new. This edition is enhanced by a new look, a larger format, fresh text design, photographs, and illustrations that make the book more attractive and user-friendly than ever before. New content reflects contemporary innovations such as Personalized Learning, Assessment for Learning, Pupil Consultation, and Every Child Matters. Updates throughout are in line with new teaching Standards and Competences in each part of the UK. Advanced material responds to the introduction of Master's Level study within many PGCE courses, the growth in evidence-informed professional practice, and more coherent continuing professional development. Research Briefings from the Teaching and Learning Research Programme (TLRP), the UK's largest ever coordinated initiative on educational research, are included. *Reflective Teaching* is the most comprehensive evidence-informed handbook on teaching and remains as ever both practical and accessible. This book and its associated resources have extremely serious intentions and contemporary relevance. We wish to support the continuing development of high-quality professionals who can enhance pupil attainment, and we also want to support new teachers in understanding the contexts in which they work and the significance of what they do. Andrew Pollard. *Reflective Teaching* is part of a set of integrated and complementary resources: [www.reflectiveteaching.co.uk](http://www.reflectiveteaching.co.uk), a fully integrated online resource providing regularly updated material; Readings for *Reflective Teaching*, a unique portable library of 120 exceptional readings; *Handbook of Reflection and Reflective Inquiry* Nona Lyons, 2010-04-07. Philosophers have warned of the perils of a life spent without reflection, but what constitutes reflective inquiry and why it's necessary in our lives can be an elusive concept. Synthesizing ideas from minds as diverse as John Dewey and Paulo Freire, the *Handbook of Reflection and Reflective Inquiry* presents reflective thought in its most vital aspects, not as a fanciful or nostalgic exercise, but as a powerful means of seeing familiar events anew, encouraging critical thinking and crucial insight in teaching and learning. In its opening pages, two seasoned educators, Maxine Greene and Lee Shulman, discuss reflective inquiry as a form of active attention, Thoreau's wide awakeness, an act of consciousness, and a process by which people can understand themselves, their work, particularly in the form of life projects, and others. Building on this foundation, the *Handbook* analyzes, through the work of 40 internationally oriented authors, definitional issues concerning reflection, what it is and is not, worldwide social and moral conditions contributing to the growing interest in reflective inquiry in professional education, reflection as promoted across professional educational domains including K-12 education, teacher education, occupational therapy, and the law, methods of facilitating and scaffolding reflective engagement, current pedagogical and research practices in reflection, approaches to assessing reflective inquiry, educators across the professions, as well as adult educators.

Keeling, 2012 Reflective teaching practice has been seen as a tool for continuous teacher improvement However before developing a novice teacher's capacity to effectively practice reflective

teaching methods we must understand what a novice teacher thinks about and why they have those considerations about their teaching practice Thus this research sought to gain a rich description of how novice teachers in a traditional secondary setting reflect in their daily teaching practice This research explored how novice teachers describe their thinking as they prepare to teach and as they reflect back upon their teaching This research project sheds light on what novice teachers tend to reflect upon increasing the likelihood that mentors and preservice training programs may better support new teachers in developing reflective teaching practices Ultimately if as the literature suggests when reflective teachers are more aware of the impact of their decisions and actions then they can be more effective with their students and produce greater results To explore this a qualitative study involving anticipatory reflection observation and retrospective reflective interviews was conducted to explore how and what novice teachers reflected about in their teaching practice This study found that novice teachers reflect in the three areas that Jay and Johnson 2002 describe descriptive comparative and critical Thus suggesting that novice teachers are capable of reflecting at higher levels of complexity than previously noted in most of the stage theories in teacher development The results also support a non linear approach to teacher development and suggest a re conceptualization of Jay and Johnson s 2002 taxonomy All participants identified barriers to maintaining reflective teaching practices They also described that participating in this study had a positive impact on them and their practices They reinforced the importance of having ongoing opportunities for structured reflection time to reflect openly and the benefits of non evaluative feedback

Pultorak,2010-03-16 Very little information about the impact of reflection on teacher performance teacher retention and student learning is available in teacher preparation programs This book provides practical and research based chapters that offer greater clarity about the particular kinds of reflection that matter and avoids talking about teacher reflection generically which implies that all kinds of reflection are of equal value This book addresses five very pertinent concepts 1 teacher reflectivity in theory and research 2 teacher reflectivity in teacher education programs 3 teacher reflectivity with teacher candidates 4 teacher reflectivity in schools and classrooms and 5 teacher reflectivity and international perspectives **Reflective Teaching as Professional Practice** Theophilus Kofi Gokah,2014 The content of this book is an important trajectory in teaching and learning It does not only explore teacher understanding and practice of reflective teaching and how teacher practitioners internalise the act in their teaching practice but adds to ongoing debates about the dynamic mix of teachers approach to teaching The reported study is exploratory based on small samples from two places Cardiff in UK and Madina in Ghana Its ethos is to compare any differences in understanding and practice of reflective teaching Drawing on qualitative exploratory case study the research found that teachers conceptualisation of reflective teaching in both cases was mixed Teachers in one case study seem to be aware of teaching evaluation as a concept in teaching and not reflective teaching Whether a lack of awareness in what reflective teaching is is synonymous to lack of knowledge is a matter of debate Reflective teaching no doubt is theorised in academic literature but its practice can be sticky in the classroom and other learning environments It is that patchy subject which

remains the focus of various enquiries including this reported study and the concern of many education authorities After all debates about quality teaching and learning are often subsumed in these debates In order for any generalisations to be made from outcomes reported in this monograph may require larger samples and careful utilisation
