**Use of Remote Sensing to Estimate Paddy Area and Production**  
Lea Rotairo,Asian Development Bank,2019 A substantial portion of the world s rice is produced and consumed in the Asia and

Pacific region As much of the region s population depends on rice farming for consumption and livelihood the demand for good quality statistics remains essential for effective policy formulation Recent advances in remote sensing serve as a viable alternative to traditional methods of compiling agricultural statistics by responding to the emerging data requirements and overall needs of modern agriculture especially for staple commodities such as rice This publication outlines the procedures methods and tools developed for generating statistics on paddy rice area and production using remote sensing and GIS techniques It is intended to encourage and assist national statistical systems in piloting and adopting satellite based techniques as an alternative to existing data collection methods while enabling other interested readers to comprehend whether the adoption of these methodologies can improve the quality and timeliness of agricultural statistics The handbook also serves as a complement to a massive online open course developed by ADB for crop area estimation

### **ShakeCast**

Loren L. Turner,David Jay Wald,Kuo-wan Lin,2009 Following a major earthquake one of Caltrans most critical tasks is to assess the condition of all potentially impacted bridges and roadway corridors in the state highway system Timely response is important to ensure public safety guide emergency vehicle traffic and re establish critical lifeline routes In the past bridge inspection teams had difficulties setting priorities immediately following an earthquake because they lacked precise information about where the worst shaking and most likely the greatest damage had occurred In 2005 Caltrans initiated a contract with the United States Geological Survey USGS to develop and implement a Caltrans specific version of their ShakeCast system a post event software analysis tool that was anticipated to change the way Caltrans responds following a major earthquake ShakeCast is a web based application that automatically retrieves measured earthquake shaking data analyzes it against individual bridge performance characteristics and generates inspection prioritization emails and other web based products for emergency responders within minutes of an event Benefits have already been realized over the course of the test deployment phase The ShakeCast system has proved to be a valuable tool for post earthquake response for Caltrans during real events as well as for scenario planning exercises
