**Economics**, 1999      The Political Economy and Ethics of Debt Financing Patrick O'Sullivan, Paolo Ricci, 2024-12-04 This book takes a fresh look at an age old controversy in ethics and political economy that stretches right back to Aristotle the morality and the economics of debt financing or the charging of interest on loans It endeavours to show the immense relevance of those ancient debates in the contemporary economy Outside of countries which practise Islam and Islamic finance the charging of interest is taken completely for granted today and little or no thought is devoted to its morality or economic and social impacts This book argues that in fact the question of the morality of charging interest is still debatable and deserves to be considered anew in the 21st century for the light it can shine on certain salient contemporary sources of economic malaise This book will first of all review the ancient debates on these questions stretching back to Aristotle seeking to restate the concerns in terms of contemporary economic theories and realities It will also then delve into the current practices in respect of lending of all kinds that can be found in those Islamic countries and financial institutions which endeavour to follow the prohibition of riba charging of any kind of interest This will be contrasted with the impact of interest and debt financing in the contemporary non Islamic economies arguing that debt financing of businesses promotes greater rates of bankruptcy over the business cycle and that the charging of interest on loans for current consumption purposes will over time increase inequality and inequitable concentration of wealth in societies where it is practised It will also be shown how in a system without predetermined interest charges problems of exponentially exploding government debt could largely and neatly be avoided by linking bondholder rewards to levels of fiscal proceeds of states This book will be of significant interest to readers in ethics moral philosophy and political economy as well as to policymakers and thinkers grappling with issues around debt burdens public and private inequality and fairness      *Prentice Hall's Guide to E-Business for Economics* Prentice-Hall Staff, Marian B. Restoring Consumer Sovereignty Adrian Kuenzler, 2017-08-18 In today's highly concentrated marketplaces social and cultural values such as the lifestyle connotations that manufacturers and sellers confer upon their goods often shape consumers prior beliefs and attitudes and affect the weight given to new information by consumers who make purchasing decisions in the marketplace Such consumer goods present the largely unexplored problem of contemporary market regulatory theory according to which an increased amount of product differentiation has rendered everyday purchasing decisions such as the choice between an iPhone or a Samsung Galaxy Note as much a matter of personal identity rather than merely one of tangible product attributes The basic challenge for market regulators and courts in such an environment is to make markets work effectively by providing a more efficient exchange of information about consumer preferences relating to tangible product features functions and quality This book demonstrates that improved legal policy can assist consumers and increase market efficiency It acknowledges that once particular beliefs held by consumers have become culturally or socially entrenched they are very difficult to change What is more changing

such beliefs is no longer simply a matter of educating people through the provision of additional information. Developing a novel framework through a detailed analysis of case law relating to consumer goods markets, this book delivers an accessible introduction to the law and economics of consumer decision making and a forceful critique of contemporary market regulatory policy.
