Name: _____ Date: _____

I. Topic or Problem

What are you interested in? What problem do you see in your school or classroom? What do you want to investigate? Your topic should not describe what you wish to find; rather, it should simply indicate an area of interest to you. Example: Meeting the needs of gifted elementary readers in a general education setting.

My topic is _____.

II. Question

Put your topic in the form of one to three questions. The question or questions are used to help guide your search for data or articles. Do not start with the answer, as this will make your research much more difficult. Example: (a) What special needs do gifted readers have in the elementary grades? (b) How can general education teachers best meet these needs within the confines of reading instruction?

My question/s is/are:

- 1.
- 2.
- 3.

III. Methodology

Briefly describe your initial plan for collecting data. For a qualitative study you should use at least two sources. This should be considered a flexible plan at this point.

IV. Advisor's Signature

Check with your advisor and get his or her signature before continuing.

Date

V. Sources

You will need a minimum of 15 sources for the literature review. These sources could be journal articles or chapters in academic textbooks. For the purpose of the proposal, you will need to see whether there is enough written on your proposed topic. Therefore, list at least eight possible journal articles or book chapters that may be of use to you (use correct APA form here).

Action Research For Health And Social Care Hart, Frederick, Bond, Meg, 1995-05-01 What is action research and how can it best be understood How can practitioners use action research to deal with problems and improve services What are the different types of action research and which might be most appropriate for use in a particular setting This book has been designed for use as a core text on research methods courses at undergraduate and postgraduate level and on professional training courses It is divided into three parts Part one traces the history of action research and shows the links between its use in education community development management research and nursing Building on this background the book explores different ways in which action research has been defined and proposes four different types each appropriate to a different problem situation and context In part two five case studies of action research are described from the perspective of the researcher including case studies of success and instructive failure Part three is designed to enable the reader to find a route through the maze of methods and approaches in action research by the use of such things as self assessment and mapping exercises a guide to diary keeping and to evaluation The final chapter suggests that by developing a project perspective action research can be of practical benefit to health and social care professionals in promoting service improvements

Implementing IT governance in the public sector by use of bootstrap algorithms Petter Ogland, 2017-11-29 It has been argued that the

reason seventy percent of all IT projects fail is due to lack of a formal system for guiding and monitoring IT decisions Organisations having explicit IT governance systems are generally twice as successful as those with poor governance given the same strategic objectives but implementing IT governance can be difficult In this book Dr Ogland looks at the public sector and argues that the implementation of IT governance has to be done through bootstrapping The bootstrap algorithm BA is a time tested approach that is known to work but it is an approach that breaks with much of the logic of the public sector bureaucracy and is expected to be met with resistance By analysing patterns in a study of trying to convince a Norwegian public sector organisation to implement IT governance through the use of the BA the book is able to provide rich insights on what causes failure and how to make the implementation process succeed

A Pac-Man Perspective on Organisational Change Petter Ogland,2017-12 Living theory is a way of making use of personal accounts of experienced practice As the Pac Man perspective on organisational change helps the change agent articulate the personal values he is committed to and how these values may be resisted in practice living theory is useful for developing knowledge that has a practical impact on self improvement and social change but it is also a type of theory that is difficult to publish in academic outlets As a consequence of this publishing Pac Man living theory research becomes a Pac Man game in itself with the journal editors as one of the four adversary gatekeepers but it is a rewarding game for those who want to contribute both theoretically and practically on how to make the world a better place
