Advanced Statistics for Testing Assumed Causal Relationships Hooshang Nayebi, 2020-08-15 This book concentrates on linear regression path analysis and logistic regressions the most used statistical techniques for the test of causal relationships Its emphasis is on the conceptions and

applications of the techniques by using simple examples without requesting any mathematical knowledge It shows multiple regression analysis accurately reconstructs the causal relationships between phenomena So it can be used to test the hypotheses about causal relationships between variables It presents that potential effects of each independent variable on the dependent variable are not limited to direct and indirect effects The path analysis shows each independent variable has a pure effect on the dependent variable So it can be shown the unique contribution of each independent variable to the variation of the dependent variable It is an advanced statistical text for the graduate students in social and behavior sciences It also serves as a reference for professionals and researchers

Multivariate Statistical Methods Jorge A. Navarro

Alberto,2016-11-03 Multivariate Statistical Methods A Primer provides an introductory overview of multivariate methods without getting too deep into the mathematical details This fourth edition is a revised and updated version of this bestselling introductory textbook It retains the clear and concise style of the previous editions of the book and focuses on examples from biological and environmental sciences The major update with this edition is that R code has been included for each of the analyses described although in practice any standard statistical package can be used The original idea with this book still applies This was to make it as short as possible and enable readers to begin using multivariate methods in an intelligent manner With updated information on multivariate analyses new references and R code included this book continues to provide a timely introduction to useful tools for multivariate statistical analysis
