The Handbook of Fixed Income Securities has been the most trusted resource for fixed income investing for decades providing everything sophisticated investors need to analyze value and manage fixed income instruments and their derivatives. But this market has changed dramatically since the last edition was published so the author has revised and updated his classic guide to put you ahead of the curve. With chapters written by the leading experts in their fields, The Handbook of Fixed Income Securities, Ninth Edition provides expert discussions about Basics of Fixed Income Analytics, Treasuries, Agency, Municipal and Corporate Bonds, Mortgage Backed and Asset Backed Securities, The Yield Curve and the Term Structure, Valuation and Relative Value, Credit Analysis, Portfolio Management and Strategies, Derivative Instruments and their Applications, Performance Attribution Analysis. The Handbook of Fixed Income Securities is the most inclusive up to date source available for fixed income facts and analyses. Its invaluable perspective and insights will help you enhance investment returns and avoid poor performance in the fixed income market.

Advanced Fixed Income Analysis Moorad Choudhry, Michele Lizzio, 2015-09-01. Each new chapter of the Second Edition covers an aspect of the fixed income market that has become relevant to investors but is not covered at an advanced level in existing textbooks. This is material that is pertinent to the investment decisions but is not freely available to those not originating the products. Professor Choudhry's method is to place ideas into contexts in order to keep them from becoming too theoretical. While the level of mathematical sophistication is both high and specialized, he includes a brief introduction to the key mathematical concepts. This is a book on the financial markets, not mathematics, and he provides few derivations and fewer proofs. He draws on both his personal experience as well as his own research to bring together subjects of practical importance to bond market investors and analysts.
