Conclusions and a Look to the Future 299 Index 317      Use of Remote Sensing to Estimate Paddy Area and Production Lea Rotairo, Asian Development Bank, 2019 A substantial portion of the world's rice is produced and consumed in the Asia and Pacific region. As much of the region's population depends on rice farming for consumption and livelihood, the demand for good quality statistics remains essential for effective policy formulation. Recent advances in remote sensing serve as a viable alternative to traditional methods of compiling agricultural statistics by responding to the emerging data requirements and overall needs of modern agriculture especially for staple commodities such as rice. This publication outlines the procedures, methods, and tools developed for generating statistics on paddy rice area and production using remote sensing and GIS techniques. It is intended to encourage and assist national statistical systems in piloting and adopting satellite-based techniques as an alternative to existing data collection methods while enabling other interested readers to comprehend whether the adoption of these methodologies can improve the quality and timeliness of agricultural statistics. The handbook also serves as a complement to a massive online open course developed by ADB for crop area estimation.

Searching 2.0 Michael P. Sauers, 2009 This book will show one in simple non-technical terms how to integrate the invisible Web into teaching opportunities wherever they occur in a one-on-one teaching moment at the reference desk or in a formal course. Estimated at 500 times the size of the visible Web, the invisible Web and the search skills needed to plumb its depths should be a part of every information literacy and research skills course. With this book, one gets expert teaching tips and scripts for informal instruction plus model activities and assignments for the classroom. Statistics and summaries of relevant research will help one combat myths like Searching Is Easy or Everything Important Is Free. Read this book too to find out how the best deep Web search tools including CompletePlanet, Closer Look, and the Librarians Internet Index are evolving and what it all means for one's library's future electronic collection development plans.
