*Elementary Synchronous Programming* Ali S. Janfada,2019-06-04 Algorithms are the essence of programming After their construction they have to be translated to the codes of a specific programming language There exists a maximum of ten basic algorithmic templates This textbook aims to provide the reader with a more convenient and efficient method to create a program by translating algorithms template by template with C and Java This is the slogan of the book You will be a professional programmer whenever you become a skilled algorithm designer This book attempts to gradually strengthen the readers ability to identify and analyze the mental commands which are issued and implemented in their brains for solving the problems in which mathematical computations are applied and try to design an algorithm based on their understanding and analyses It then seeks to encourage the readers to develop their skills in algorithm writing for computational problems and synchronously teach them to translate the algorithms into C and Java codes using the least necessary keywords

**Computational Technologies** Petr N. Vabishchevich,2014-12-11 In this book we describe the basic elements of present computational technologies that use the algorithmic languages C C The emphasis is on GNU compilers and libraries FOSS for the solution of computational mathematics problems and visualization of the obtained data At the beginning a brief introduction to C is given with emphasis on its easy use in scientific and engineering computations We describe the basic elements of the language such as variables data types executable statements functions arrays pointers dynamic memory and file management After that we present some observations on the C programming language We discuss the issues of program compiling linking and debugging A quick guide to Eclipse is also presented in the book The main features for editing compiling debugging and application assembling are considered As examples we solve the standard problems of computational mathematics operations with vectors and matrices linear algebra problems solution of nonlinear equations numerical differentiation and integration interpolation initial value problems for ODEs and so on Finally basic features of computational technologies are illustrated with model problems All programs are implemented in C C with using the GSL library Gnuplot is employed to visualize the results of computations     **C# 3.0 THE COMPLETE REFERENCE 3/E** Herbert Schildt,2008-12-30 Publisher s Note Products purchased from Third Party sellers are not guaranteed by the publisher for
