Holt Science & Technology ,2001 *Life Science* ,2005 **Breeding Contempt** Mark A. Largent,2011 From the Publisher Most closely associated today with the Nazis and World War II atrocities eugenics is sometimes described as a government orchestrated breeding program other times as a pseudo science and often as the first step leading to genocide Less frequently is it depicted as a movement having links to America a nation that has historically prided itself for its scientific rationality But eugenics does have a history in the United States a history that is largely the story of biologist Charles Davenport Davenport who led the Eugenics Records Office in the late nineteenth century provided physicians social scientists and lawmakers with the scientific data and authority that enabled them to coercively sterilize men and women who were thought to be socially deviant unfit to pass on their genes and unable to raise healthy children Moreover Mark A Largent shows how even in modern times remnants of eugenics philosophies persist in this country as certain public figures advocate a brand of birth control such as progesterone shots for male criminals that are only steps away from the castrations that were once performed
