The continental atlas of the distribution of tsetse flies in Africa Cecchi, G.; Paone, M.; de Gier, J.; Zhao, W., 2024-09-24
Tsetse flies Genus *Glossina* occur in sub Saharan Africa where they transmit trypanosomosis a group of parasitic diseases that affect both animals and humans Tsetse and trypanosomosis are a constant drain on the resources of poor African livestock keepers and they also impose a public health burden Comprehensive data on the geographic distribution of tsetse flies is crucial to design evidence based and cost effective strategies against animal trypanosomoses and it is also important in eliminating the human form of the disease Despite this the latest maps of tsetse distribution in Africa were published several decades ago The present publication provides an update on the geographical distribution of tsetse flies in Africa A total of 669 scientific publications spanning a period of 31 years 1990 2020 provided the input data and almost 7 400 distinct geographical locations were mapped Tsetse flies were recorded from a maximum latitude of 15 North in Senegal to a minimum of 28 5 South in South Africa Data coverage is uneven and no eligible publication was found for Burundi Guinea Bissau Liberia Sierra Leone or Somalia A dearth of information also affects a few other countries such as Angola the Congo the Democratic Republic of the Congo and South Sudan At the level of tsetse species relatively abundant data were identified for the species of major veterinary and public health importance especially of the riverine palpalis and savannah morsitans groups By contrast limited information is available on many species of the forest fusca group The continental atlas of tsetse flies in combination with the upcoming component on animal trypanosomosis can be used by policy makers practitioners and scientists engaged in the control and elimination of tsetse flies and trypanosomosis in Africa It also provides a blueprint for national authorities to develop country level information systems i e national atlases to assist planning and monitoring of control activities at the national and local levels

Mathematical Journal, 1951 **The rising costs of nutritious foods: The case of Ethiopia** Bachewe, Fantu Nisrane, Minten, Bart, 2019-08-27 Costs of healthy diets are worryingly rising in a number of developed and emerging economies However less is known on these costs for developing countries Using price data from a large number of markets in Ethiopia we find that real prices of all nutritionally rich food groups increased significantly between 19 and 62 percent

over the period 2007 to 2016 This contrasts with 1 staple crops grains roots and tubers which did not show any price increase and 2 oils fats and sugar the prices of which decreased substantially Using detailed nationwide datasets and relying on time series methods we link these price increases to changes in local markets demand and supply factors transaction costs and international trade We find that prices of nutritionally rich food groups compared to cereals are relatively less affected by international trade and exchange rate changes but more so by rapidly increasing local and city demand This rising demand is likely due to recent income growth and rapid urbanization and the high income elasticities for nutritious foods in Ethiopia Moreover we find that local production changes affected prices of nutritious items little but national price rises were found to have been significantly linked with food price rises in commercial clusters in the country Changes in transaction costs fuel and transport costs explained relatively little of the observed food price changes

Peace Not War: Traditions of Restorative Justice in Imperial Ethiopia, 1769 - 1960 Charles Schaefer,2025-05-27 Examines one of the few documented early examples of restorative justice from Africa or Latin America With a writing system Ethiopian emperors as well as pretenders to the throne chronicled their exploits including peace building feats and this book showcases and analyses historically verified instances from as early as 1769 where restorative justice modalities were used to resolve conflict and bring peace to the country Peace not War traces Ethiopia s evolving understanding of restorative justice from the forgive and forget approach which characterized the Zemene Mesafint Era of the Princes where perpetrators were exonerated allowing them to recoup and build their armies to fight another day to conditional forgiveness recorded by the imperial court and dependent on atonement Ethiopia s long history of experimentation with different forms of restorative justice demonstrates ingenuity flexibility and adaptability but as the twentieth century progressed workable indigenous forms of restorative justice were sidelined by Western codified law that emphasized retribution
