Can TTD Lead the Way with Neuromarketing?**, 2023-04-21 Seminar paper from the year 2022 in the subject Communications Public Relations Advertising Marketing Social Media grade 1 0 Hult International Business School language English abstract The Trade Desk hereinafter TTD is a global technology firm with a focus on real time programmatic marketing automation solutions goods and services TTD identifies the main challenge on how TTD should work with significant TV platforms and providers to help drive this culture change among advertisers A potential for marketers

has arisen as a result of the emergence of CTV. More influential platforms including Netflix, Disney, and HBO Max have lately committed offering discounted subscriptions in return for a few minutes of ads between series and movies. The promise of highly targeted, data-driven ad impressions for TV, which is frequently the largest campaign component, has replaced the conventional upfront approach where marketers commit billions in advance with no clear notion of who will see their ads. To delve into this problem and narrow it down to finally come up with a more detailed research question, the onion approach was used. The funnel process within the framework of this research entails current data and its outlook of the ads market, both for traditional as well as CTV ads, a breakdown of both advertisement methods, its bidding allocation processes, differences, as well as its ad and disadvantages are explored. Furthermore, the significance of data collection opportunity for CTV ads and problems that might arise with it are discussed, addition ally to opportunities and risks that could emerge with this new shift to CTV ads, before finally ending in the research question: Can TTD revolutionize CTV advertising through neuromarketing and establish itself as the leading software platform for CTV platforms by displaying highly personalized ads to each unique user? Even though the current CTV advertising already provides promising metrics to measure the success rate of the respective advertisements, ads are only distributed to the according series and movies rather than to the user himself. Thus, if TTD would establish a solution to be able to show specific ads to specific users, the value, both quantitative ROI and qualitative, visiting the website, shopping the product, will increase significantly.

Capital Allocation: Principles, Strategies, and Processes for Creating Long-Term Shareholder Value David R. Giroux, 2021-10-26

Seize the competitive edge through intelligent, differentiated capital allocation. The intelligent deployment of capital is one of the most effective ways to create long-term value. But despite this, there are very few capital allocation experts on the boards of the largest publicly traded companies, and academic research consistently finds that most firms deploy capital sub-optimally. Capital Allocation aims to educate senior leaders, board members, investors, students, and anyone interested in business on this important topic. Until now, very little has been written on capital allocation outside of academia, even though the strategic deployment of excess capital is an increasingly significant source of competitive advantage for many companies. David Giroux, Chief Investment Officer for Equities and Multi-Asset and Head of Investment Strategy at T. Rowe Price, covers the entire gamut of capital allocation issues, including optimal capital structure, capital allocation alternatives, mergers, acquisitions, and special situations. Capital Allocation walks you through this critical topic from beginning to end, including stories of companies that allocated capital in ways that created significant shareholder value. Several real-life decision-making models you can use for strategically allocating your firm's capital. Guidelines for generating high returns in the long term to build sustainable shareholder wealth. Giroux uses academic research, personal experience, and uncomplicated mathematics to reveal approaches and actions that create long-term value. He provides case studies from Kodak, Comcast, Thermo Fisher Scientific, Danaher, General Electric, Microsoft, and others, showing how capital allocation has and hasn't worked in real-life situations.

And he shows how to use capital allocation to head off possible activist investors Capital Allocation offers everything you need to know for deploying capital wisely to outperform your competitors over the long term *Collier's* ,1929
