Fine, Peggy McCardle, 2017-03-27 *How Animals Help Students Learn* summarizes what we know about the impact of animals in education and synthesizes the thinking of prominent leaders in research and practice. It is a much needed resource for mental health and education professionals interested in incorporating animals in school based environments. Group-Centered Prevention Programs for At-Risk Students Elaine Clanton Harpine, 2010-11-09 School psychologists, counselors, and educators in the K-12 setting face the daunting responsibility of finding balance between mandated testing, students' mental health concerns, and additional academic help for at-risk students. One solution to this dilemma is to implement a school-based mental health approach that combines learning and counseling needs into a single program. Several types of successful programs are available, though week-long intensive programs have recently increased in popularity. *Group-Centered Prevention Programs for At-Risk Students* focuses on the development of such a week-long prevention program and provides professionals with step-by-step directions to create their own program. It also focuses on the use of group-centered interventions as an opportunity to prevent at-risk behaviors as a means of correcting or changing dysfunctional behavior. This highly readable volume addresses such challenging issues as: Using self-reflection to teach writing skills; Increasing interpersonal interaction while honing etiquette; Enhancing group acceptance and reading comprehension; Rebuilding self-efficacy by increasing word recognition and decoding skills. With its solid research foundation combined with clear practical program descriptions, this volume is an essential addition to the libraries of researchers and practitioners alike in the disciplines of school psychology, education, social work, psychotherapy, and counseling, and clinical child psychology. *Bibliographic Guide to Education*, 2001 lists publications cataloged by Teachers College, Columbia University, supplemented by The Research Libraries of The New York Public Library. *Teaching Students with Emotional and Behavioral Disabilities* Brittany L. Hott, Kathleen M. Randolph, Lesli Raymond, 2020-10-23 *Teaching Students with Emotional and Behavioral Disabilities* provides a comprehensive resource for preservice and in-service educators to teach and support academic, social, and behavioral development. The text focuses on implementation of evidence-based interventions, strategies, and practices. Dedicated chapters address quality service delivery models, including individual classroom and school-wide supports. In addition, academic intervention chapters concentrate on reading, mathematics, writing, and study skills. Finally, the book includes step-by-step directions for conducting Functional Behavior Assessments (FBA), developing Behavior Intervention Plans (BIP), and monitoring student progress. The book will serve as a valuable reference for educators supporting

students with challenging behaviors Key Features Case studies written by PreK 12 practitioners based on their experiences supporting students with emotional and behavioral disorders Numerous worksheets and examples to support implementation of evidence based practices Accessible and consistent format across all chapters Pedagogical aids reinforce understanding chapter objectives key terms chapter summaries discussion questions and lists of additional resources and readings

Reading Randomised Controlled Trials Robert Savage, Amy Fox, Anneka Dawson, Helen Gray, Clare Huxley, 2025-03-03 In early 2021/22 the Flexible Phonics reading intervention a large scale randomised controlled trial took place in 118 schools in England and involved nearly 3 000 children This study aimed to provide valuable insights into the success of largely school based education trials The Flexible Phonics trial proved to be not only an important experiment in improving children's literacy but a case study in which the methodology of single randomised controlled trials in education can be considered Reading Randomised Controlled Trials investigates the complexities of conducting randomised controlled trials in the field of education and how they can be seen as a cultural activity The book emphasises the human operations decision making and actions that drive such trials which are often overlooked in published reports Through the case study of Flexible Phonics the book highlights the key differences between scaled educational trials and other types of trials such as pharmaceutical trials The additional focus on early childhood literacy is of significant educational importance particularly in the context of UK school partial closures in 2020 and 2021 during the Covid 19 pandemic Reading Randomised Controlled Trials is ultimately a unique resource on the implementation of randomised controlled trials in authentic school contexts and for the sustained improvement of practice in education
