Foundations of Real-World Economics John Komlos,2019-01-11 The 2008 financial crisis the rise of Trumpism and the other populist movements which have followed in their wake have grown out of the frustrations of those hurt by the economic policies advocated by conventional economists for generations Despite this textbooks continue to praise conventional policies such as deregulation and hyperglobalization This textbook demonstrates how misleading it can be to apply oversimplified models of perfect competition to the real world The math works well on college blackboards but not so well on the Main Streets of America This volume explores the realities of oligopolies the real impact of the minimum wage the double edged sword of free trade and other ways in which powerful institutions cause distortions in the mainstream models Bringing together the work of key scholars such as Kahneman Minsky and Schumpeter this book demonstrates how we should take into account the inefficiencies that arise due to asymmetric information mental biases unequal distribution of wealth and power and the manipulation of demand This textbook offers students a valuable introductory text with insights into the workings of real markets not just imaginary ones formulated by blackboard economists A must have for students studying the principles of economics as well as micro and macroeconomics this textbook redresses the existing imbalance in economic teaching Instead of clinging to an ideology that only enriched the 1% Komlos sketches the outline of a capitalism with a human face an economy in which people live contented lives with dignity instead of focusing on GNP

explode with disastrous consequences for the economy and for each of us Schiff demonstrates how the infusion of billions of dollars of stimulus money has only dug a deeper hole the United States government simply spends too much and does not collect enough money to pay its debts and in the end Americans from all walks of life will face a crushing consequence We re in hock to China we can t afford the homes we own and the entire premise of our currency backed by the full faith and credit of the United States is false Our system is broken Schiff says and there are only two paths forward The one we re on now leads to a currency and sovereign debt crisis that will utterly destroy our economy and impoverish the vast majority of our citizens However if we change course the road ahead will be a bit rockier at first but the final destination will be far more appealing If we want to avoid complete collapse we must drastically reduce government spending eliminate entire agencies end costly foreign military escapades and focus only on national defense and stop student loan or mortgage interest deductions as well as drug wars and bank and business bailouts We must also do what no politician or pundit has proposed America should declare bankruptcy restructure its debts and reform our system from the ground up Persuasively argued and provocative *The Real Crash* explains how we got into this mess how we might get out of it and what happens if we don t And with wisdom born from having predicted the Crash of 2008 Peter Schiff explains how to protect yourself your family your money and your country against what he predicts
