Network Based High Speed Product Development Peter Lindgren,2022-09-01 In the first decade of the 21st century product development in networks was predicted to be of ever increasing importance to businesses of all sizes because of changes in markets in technology in networks and in the competences of Businesses The growth in new products share of businesses total turnover and earnings were increasing at an unprecedented speed The entrepreneurial innovations and technological improvements had resulted in the increasingly fast development of new products and services Businesses and industries in different countries became increasingly more linked and interdependent in networks with respect to materials business operations and particularly product development to match the wants and needs of the global market environment to high speed product development Businesses were therefore encountering increasingly dynamic market fragmentation shrinking time in market increasing product variety demands of production to customer specifications reduced product lifetimes and globalization of production Networks were vital because the competition is not business against business but network against network Networks are vital because an increasing part of product development was carried out in all types of networks containing physical ICT dynamic and virtual networks Speed and pressure on time in product development seemed to continue to increase because customer demands for new products seemed to continue to increase However a Business seldom possessed all needed competences and managers saw product development based on networks as an important solution to meet the strong competition of the future global markets and the strong demand for innovation and innovativeness The evolution of market demands and focus required on competencies of businesses could be characterized as a development from a focus on efficiency to a focus on quality and flexibility to a focus on speed and innovativeness This was why it was interesting and important to research and discuss product development and especially to understand high speed product development of individualized products in fragile market segments Consequently findings and learning on aspects like enablers management tools technological tools product development models product development processes and network tools to speed new product development are presented in this book

Entrepreneurship in Theory and Practice Suna Løwe Nielsen, Kim Klyver, Majbritt Rostgaard Evald, Torben Bager, 2021-03-26 The third edition of this creative and successful textbook provides a broad overview of entrepreneurship from a theoretical and practical perspective Engaging for undergraduates it embeds theories of entrepreneurship with tensions and dilemmas presented as paradoxes for each chapter It offers insights into the entrepreneurial process and challenges readers to assess the paradoxes and pitfalls encountered on an entrepreneurial journey

Collaborative Communities of Firms Anne Bøllingtoft, Lex Donaldson, George P. Huber, Dorthe Døjbak Håkonsson, Charles C. Snow, 2011-11-23 Faced with the ever accelerating pace of technological change and the restructuring of markets many firms have been questioning the appropriateness of their own organizational structure and effectiveness Consequently we have witnessed much organizational experimentation and the development of new forms of

organizing over the last decade Firms are more dependent than ever on the need for continuous and radical innovations and often innovations that go beyond their existing businesses This challenges firms in terms of knowledge and idea sharing and often necessitates the need to expand beyond the boundaries of the single firm for multi party collaboration to meet serious challenges and develop creative solutions Drawing from the Fourth International Workshop on Organization Design and featuring contributions from an international array of specialists this volume focuses on the expansion beyond the boundaries of the single firm and multi firm networks to include for example community based organization designs A community is a connected set of firms the connections can take on many different dimensions For organization design theory community based organizations have many implications For one organization design theory has to identify and describe designs that enhance collaborative behavior among firms without restricting the ability of the individual firm to continue to compete within its own marketplace Moreover organization design theory also has to identify and describe information processing strategies and designs that allow the continuous generation sharing and application of existing information and knowledge The development of effective collaborative community designs is critically important to the global economy because increasingly our future depends on pursuing shared goals and sustainably developing our global commons Ideally the ideas and findings in this book will contribute to increased attention to new organization designs capable of meeting 21st century opportunities and challenges
