Advances in Control Education 2000 Ljubisa Vlačić, M. L. Brisk, 2001 Advances in Control Education 2000 saw the additional sponsorship of the Institute of Electrical and Electronic Engineers IEEE Control System Society and the Institution of Engineers Australia National Committee on Automation Control Instrumentation One hundred and three authors from 31 countries submitted their full scale manuscripts Each received at least three reviews overseen and coordinated by the International Program Committee members Twenty six members of the International Program Committee participated in the review process All reviews were anonymous In many cases after writing initial assessments reviewers were put in touch with the Program Committee Co Chairman to discuss a paper further by e mail Sixty papers were selected for full presentation Only those successfully presented at the conference are included in these proceedings Despite its small population Australia has always had a high level of international activity in control with Australian researchers contributing world leading academic work in control It has had a President of IFAC itself Professor Brian Anderson and many names are instantly recognisable at the forefront of developments in control theory It also has major industrial processes in minerals petrochemicals food and agricultural processing in manufacturing in transport and in communications that look to control for safety efficiency and reduced environmental impacts The education of engineers in the various aspects of control is thus of vital importance to Australia as it is to all developed and developing countries

Swarm, Evolutionary, and Memetic Computing Bijaya Ketan Panigrahi, Swagatam Das, Ponnuthurai Nagarathnam Suganthan, Subhransu Sekhar Dash, 2010-12-06 This LNCS volume contains the papers presented at the First Swarm Evolutionary and Memetic Computing Conference SEMCCO 2010 held during December 16 18 2010 at SRM University Chennai in India SEMCCO 2010 marked the beginning of a prestigious international conference series that aims at bringing together researchers from academia and industry to report and review the latest progress in the cutting edge research on swarm evolutionary and memetic computing to explore new application areas to design new bio inspired algorithms for

solving specific hard optimization problems and finally to create awareness on these domains to a wider audience of practitioners SEMCCO 2010 received 225 paper submissions from 20 countries across the globe After a rigorous peer review process involving 610 reviews in total 90 full length articles were accepted for oral presentation at the conference This corresponds to an acceptance rate of 40% and is intended for maintaining the high standards of the conference proceedings The papers included in this LNCS volume cover a wide range of topics in swarm evolutionary and memetic computing algorithms and their real world applications in problems selected from diverse domains of science and engineering

Computational Science - ICCS 2002 Peter M.A. Sloot, C.J. Kenneth Tan, Jack J. Dongarra, Alfons G.

Hoekstra, 2002-04-12 Computational Science is the scientific discipline that aims at the development and understanding of new computational methods and techniques to model and simulate complex systems The area of application includes natural systems such as biology environmental and geosciences physics and chemistry and synthetic systems such as electronics and financial and economic systems The discipline is a bridge between classical computer science logic complexity architecture algorithms mathematics and the use of computers in the aforementioned areas The relevance for society stems from the numerous challenges that exist in the various science and engineering disciplines which can be tackled by advances made in this field For instance new models and methods to study environmental issues like the quality of air water and soil and weather and climate predictions through simulations as well as the simulation supported development of cars airplanes and medical and transport systems etc Paraphrasing R Kenway R D Kenway Contemporary Physics 1994 There is an important message to scientists politicians and industrialists in the future science the best industrial design and manufacture the greatest medical progress and the most accurate environmental monitoring and forecasting will be done by countries that most rapidly exploit the full potential of computational science Nowadays we have access to high end computer architectures and a large range of computing environments mainly as a consequence of the enormous stimulus from the various
