Comprehensive Nuclear Materials, 2020-07-22 Materials in a nuclear environment are exposed to extreme conditions of  
radiation temperature and or corrosion and in many cases the combination of these makes the material behavior very  
different from conventional materials This is evident for the four major technological challenges the nuclear technology  
domain is facing currently i long term operation of existing Generation II nuclear power plants ii the design of the next  
generation reactors Generation IV iii the construction of the ITER fusion reactor in Cadarache France iv and the intermediate  
and final disposal of nuclear waste In order to address these challenges engineers and designers need to know the properties  
of a wide variety of materials under these conditions and to understand the underlying processes affecting changes in their  
behavior in order to assess their performance and to determine the limits of operation *Comprehensive Nuclear Materials*
