**International Politics** Malam Wasai,2023-09-18 Submitted Assignment from the year 2023 in the subject Politics General and Theories of International Politics language English abstract Greater scrutiny is necessary because AI will have a significant impact on international relations such as putting new topics on the international agenda challenging geostrategic relations serving as a tool for diplomats and negotiators and creating new opportunities and concerns about protecting human rights Scholars and diplomats have found it helpful to think about the different things that affect international relations by breaking them down into three levels of analysis individual state and international State level analysis examines the foreign policy behavior of states in terms of state characteristics For example some scholars say that all democracies behave a certain way they don t fight with other democracies Artificial intelligence impact governance As AI continues to evolve and permeate various aspects of our lives its implications for AI and how does it impact businesses AI artificial intelligence refers to machines that can perceive intelligence synthesize and infer information It is the science and engineering of intelligent machines that can mimic human intelligence to perform tasks and then on the information they collect improve themselves based AI is designed to significantly enhance human capabilities and contributions making it a valuable business asset      **Rules on Digital Trade in the Light of World Trade Organization Agreements** Asif

Khan,2023-12-14 Doctoral Thesis Dissertation from the year 2023 in the subject Business economics Trade and Distribution

language English abstract This doctoral dissertation deals with rules on digital trade in the light of WTO agreements Digital trade has brought about profound changes in the international trade framework Traditional trade which primarily involved the exchange of physical goods has now expanded to encompass a wide range of digitally delivered services online transactions and data flows This transformation has been driven by advancements in technology and the increasing interconnectedness of the global economy The digital economy encompasses various digital technologies and platforms and has become a significant driver of economic growth and innovation It allows businesses to reach international markets more quickly and efficiently transcending geographical barriers The internet mobile devices cloud computing and artificial intelligence have facilitated this digital transformation These technologies enable seamless communication data storage and processing automation and personalised services revolutionising how businesses operate and engage in international trade Digital trade has created new opportunities for businesses of all sizes Small and medium sized enterprises have benefited from the ability to access global markets through digital platforms and e commerce These platforms provide a means for Small and medium sized enterprises to connect with potential customers worldwide establish their presence and market their products and services without needing a physical presence in foreign markets This has lowered entry barriers and empowered Small and medium sized enterprises to participate in global value chains expanding their reach and contributing to economic growth One of the notable developments in the digital trade era is the rise of platform based businesses These platforms such as e commerce marketplaces ride sharing services and online payment systems act as intermediaries connecting buyers and sellers across borders They facilitate transactions provide infrastructure and services and enable businesses to expand their customer base globally Platforms have become influential players in international trade shaping market dynamics and redefining traditional trading system *The Wall Street Journal*, 2009 *The economic impact of FinTech companies on the traditional banking sector and possible future scenarios* Malik Dakdaki, 2017-11-07 Bachelor Thesis from the year 2017 in the subject Business economics Accounting and Taxes grade 1 3 University of applied sciences Frankfurt a M FOM language English abstract The beginning of the digital revolution at the turn of the millennium has ushered in a structural change in many sectors Due to the increased use of modern information and communication technologies ICT several sectors have already experienced existential economic implications This is especially evident in the music media and publishing industries For example music is not only purchased on CDs from local retail stores but is also increasingly consumed via the Internet through streaming services such as Spotify Videos store rentals compete with the comfortable video on demand services available in customers own homes The Internet as a medium for information and consumption for products and services has established itself as a faster more comfortable and more efficient channel in comparison to traditional sales channels Stationary retail stores were also not spared from digital disruption The market research institute Gesellschaft f r Konsumforschung GfK predicts a doubling of the online share of retail sales from currently

to 20% by the year 2025. At the same time, new and innovative market participants known as financial technology or FinTech companies are edging into the financial sector and trying to gain market share from established banks through customer-friendly products and services. Nevertheless, the banks do not seem to recognize the seriousness of the situation and therefore are reluctant to adapt to the new situation. However, experience has shown that ignorance of an industry's digitization has already led to the fall of large and established companies. As a well-known example in the technology industry, Kodak is often referred to in this context. The company's reaction to the digital disruption took place too late, whereas other companies had already recognized the trend towards digital photography at an earlier stage and prepared corresponding products. As a result, Kodak plummeted from the top of the photography technology industry. Evidence of ongoing digital disruption of the financial services sector has already been provided in the form of a new type of bank, the direct bank, which was first introduced in the early 1990s. FinTech companies seek to take advantage of this success and gain customers and market share by offering innovative solutions for financial products and services.

How do Fintech Startups and a Changing Consumer Behavior Reshape the Financial Services Industry? Viktor Kanzler, 2015-05-18 Bachelor Thesis from the year 2015 in the subject Business economics Business Management Corporate Governance grade 1.3 Frankfurt School of Finance Management language English abstract The purpose of this study is to illustrate how Fintech startups and other non-financial institutions reshape the finance industry as they take advantage of recent technology trends and lifestyle shifts affecting customers' expectations. The thesis aims to show how the competitive landscape changes and to what extent digital attackers grab parts of the value chain. The study also maps out the Fintech landscape, highlights important growth trends, and gives an overview of the services and products with which Fintech startups are currently edging into the market. Moreover, the study points out the specific drivers and barriers relevant to Fintech companies. A further objective was to find out whether Fintech startups pose a serious threat to traditional providers and, if so, which generic approaches exist to deal with these attackers. Apart from that, the aim was to identify how peers address digitization as well as what strengths traditional banks can rely on. Last but not least, the study demonstrates what banks and other institutions can learn from Fintech startups and how the future of finance could develop and look like in 2020.

**Marketing**, 2009 *Critical Success Factors Driving Customer Adoption of Cloud Gaming Platforms* Timo Grünzinger, 2024-03-04 Master's Thesis from the year 2021 in the subject Business economics Information Management grade 1.9/2.0 language English abstract This work project aims to identify factors that have an impact on customer adoption of cloud gaming platforms. Based on the Unified Theory of Acceptance and Use of Technology combined with the concept of Flow as well as further amendments relevant for hedonic information systems, a structural equation model was developed and empirically tested on a convenience sample of gaming community members. Besides the significance of price value on user acceptance, the empirical results suggest that social influence together with a flow state associated with the hedonic motivation of cloud gaming play a critical role in customer

adoption     *Impact of Influencer Marketing on Young Women's Customer Experience on Cosmetic Products* Jule Prescher, 2023-06-06 Bachelor Thesis from the year 2023 in the subject Communications Multimedia Internet New Technologies grade 1 3 University of applied sciences Cologne language English abstract This thesis aims to realize how influencer marketing performs and its impact on the Cx Therefore the research addresses the following questions How powerful are influencers these days What is different about influencer marketing and why is it a successful strategy How do people perceive information shared by influencers and which factors are decisive for potential customers to purchase products advertised by influencers What impact does an influencer have on the overall Cx The internet has been fully integrated into people's daily lives worldwide over the past years The percentage of the world's population with access to the internet has doubled from 32% in 2011 to 63% in 2021 90% of people from developed countries access the internet in 2021 At the same time the number of social network users is increasing These networks have the purpose of connecting with friends In 2022 5 billion people have access to the internet worldwide and 4.7 billion people use social media SM Ultimately 93% of those with internet access own at least one SM account that is more than half the population worldwide Through time companies found new marketing strategies which reached active people on SM These platforms are necessary to reach Generation Z people born in the late 1990s They are different and cannot be reached in the same way as they watch Netflix instead of TV or listen to Spotify instead of the radio for example Influencer marketing became a 10 billion industry in 2020 Influencers share their lives on SM networks Due to their high reach they receive offers from companies for cooperation Influencers' followers admire and trust their recommendations due to their personal and authentic representation While advertising products influencers show how to use them where to buy them and give their opinion For higher sales influencers often receive promo codes for a discount or free products for each order
