Design Against Crime Caroline L. Davey, Andrew B. Wootton, 2017-02-17
Design Against Crime will aid the design profession to meet the challenges presented by the competing needs and complex systems around crime and security. It proposes that designers should use their creative talents to develop innovative solutions to security problems that contribute to the ongoing fight against crime. The authors first explain the design against crime approach to security and security. They go on to provide practical advice on addressing crime and insecurity within the design process and offer practical examples of design being applied to security and safety. They also examine crime victimisation from a global perspective highlighting the benefits worldwide of reducing opportunities for crime including issues of national security such as terrorism and natural disasters. A design led human centred approach provides a way forward that is both aspirational and practical. The book is aimed primarily at design professionals, educators and students interested in safety and security from all design disciplines including product design, architecture, service design and communication design. The book should also be read by crime prevention experts, planners, local authorities, managers of urban environments and policymakers.

Cyber Dictionary David Morse, 1996

A Practical Guide to Internet Filters
Karen G. Schneider, 1997
What are filters and how do they work? Which ones are the most effective for school and public libraries? Are there legal ramifications to using filters? As more libraries offer Internet access to their customers, filtering is becoming a major topic with library boards, governing officials and the community. This book is a guide that aims to prepare and inform librarians in schools and public libraries about the issue. Contents include a description of filters and their alternatives along with factors to consider in the library's decision whether to use them or not, explanations and evaluations of over a dozen client based filters, proxy servers and proxy server enhancements including Bess Cyber Patrol, Cybersitter, Net Nanny, Safesurf, Surf Watch and Websense, a discussion on the legal issues involving filters including recent cases and the question of how much legal responsibility libraries have for Web content they make available.
