SME Mineral Processing and Extractive Metallurgy Handbook Courtney A. Young, 2019-02-01 This landmark publication distills the body of knowledge that characterizes mineral processing and extractive metallurgy as disciplinary fields. It will inspire and inform current and future generations of minerals and metallurgy professionals. Mineral processing and extractive metallurgy are atypical disciplines requiring a combination of knowledge, experience, and art. Investing in this trove of valuable information is a must for all those involved in the industry: students, engineers, mill managers, and operators. More than 192 internationally recognized experts have contributed to the handbook's 128 thought-provoking chapters that examine nearly every aspect of mineral processing and extractive metallurgy. This inclusive reference addresses the magnitude of traditional industry topics and also addresses the new technologies and important cultural and social issues that are important today.

Contents: Mineral Characterization and Analysis; Management and Reporting; Comminution; Classification and Washing; Transport and Storage; Physical Separations; Flotation; Solid and Liquid Separation; Disposal; Hydrometallurgy; Pyrometallurgy; Processing of Selected Metals; Minerals and Materials.

Artificial Intelligence in Traditional Medicine Research and Application Taoyang Wu, Lihong Peng, Jidong Lang, Michael Heinrich, 2026-02-24

Traditional medicine TM represents a vast body of knowledge and practices aimed at preventing diagnosing improving or treating both physical and mental illnesses Despite significant advancements there remain critical challenges that demand ongoing research in this field These include issues such as the variability and the poorly defined composition of traditional medicine preparations the lack of standardization and insufficient quality data on their efficacy Moreover there are ongoing debates about how best to integrate traditional and biomedical practices within modern healthcare systems The advent of artificial intelligence AI has introduced a new dimension to this domain Recent breakthroughs in AI including machine learning and deep learning have begun to enhance the efficacy understanding and procedural efficiency of traditional medicine This Research Topic aims to explore the transformative potential of AI in traditional medicine while addressing the significant hurdles that accompany its application The focus is to investigate how AI can optimize the discovery and development process in traditional medicine improve efficacy predictions and efficiently integrate traditional healing approaches into contemporary healthcare practices To gather further insights into this area we welcome articles addressing but not limited to the following themes

- AI Utilization in Traditional Medicine
- Applications of deep learning and machine learning for data analysis and pharmacodynamics
- AI and Network Analysis in Traditional Medicine
- Exploring herbal network relationships and complex mechanisms through AI technology
- AI driven Redevelopment of Traditional Medicines
- Utilizing AI for novel applications and target discovery in traditional medicine
- AI in Traditional Medicine Target Prediction
- Utilizing AI to predict interactions and potential therapeutic targets
- Novel Combinations of Traditional Medicines
- Using AI to predict and analyze effective combinations for disease treatment
- Prospective Studies and Reviews
