ChatGPT in Scientific Research and Writing Jie Han, Wei Qiu, Eric Lichtfouse, 2024-09-13 Most scientists are constantly under pressure for reading essential literature, designing new experiments, writing successful proposals and papers, and meeting deadlines. However, imagine that your brain is connected to the entire human knowledge and can extract instantly essential information for discovery. Imagine that research tasks that took days to months can now be done within few seconds. This is not science fiction anymore since the onset of generative artificial intelligence tools such as ChatGPT. This book explains concisely and simply how to use ChatGPT for identifying new results, crafting titles, editing language, interpreting figures, creating visuals, and refining methods. In particular, you will learn how to leverage ChatGPT's unique capabilities to generate ideas, streamline literature reviews, and craft compelling narratives. In short, this book empowers you to unlock the potential of ChatGPT, boosting productivity and taking your scientific research and writing to new heights.

THEY WANT TO BUILD THE WORLD WITHOUT US Alexander Sugiharto, 2025-12-09 The clock is ticking. 2030 is not a distant date; it is the deadline for civilization as we know it. *The 2030 Reckoning* tears away the polished veneer of innovation to expose the shadowy cabal of global elites and powerful corporations who are weaponizing AI not for progress but for absolute authoritarian control. Technocapitalists: The hyper-wealthy funding the AI revolution, viewing human labor and autonomy as inefficient obstacles to maximum profit. Technofascists: The architects using algorithmic power to design a new, rigid social order—a world where every choice is monitored, every dissent is silenced, and every life is managed by a centralized, non-human intelligence. **INSIDE THIS EXPLOSIVE INVESTIGATION** Every chapter dissects the catastrophic impact of AI development on a different pillar of civilization, revealing the blueprint for global dominance. Humanity: The fusion of man and

machine and the dark agenda to redefine or replace the human soul Politics The end of democracy as algorithmic governance takes over making human choice irrelevant Economics The final collapse of labor the universal basic income trap and the rise of a cashless fully monitored economy The Military The chilling reality of autonomous weapons and global surveillance nets designed for total submission Religion The machine s replacement for faith purpose and the divine Stop viewing AI as a tool It is the ultimate Trojan Horse delivering total power into the hands of the elite who seek to finalize their vision for a future without free will Your time to understand the conspiracy is running out Read The 2030 Reckoning now and arm yourself with the truth before the future is coded and locked down forever [Artificial Intelligence](#) Arthur G.O. Leadership 2.0 in processes of a sustainable change Prof. Dr. Michael Kurwan,2025-06-30 Document from the year 2025 in the subject Leadership and Human Resources Leadership language English abstract In order to successfully implement sustainable changes in a company in the context of change processes strong leadership is required at the top of a company which should have a great deal of empathy and a sure instinct in order to position the company in the market in the long term and profitably In order to successfully shape these sustainable changes it will not be the famous power of the leader of the past but will only work with the involvement of employees in the new world of work in the knowledge age which is characterized by digitalization and artificial intelligence This new form of leadership is also referred to as Leadership 2 0 in which it is important to retain top performers and in particular key personnel in the company in the long term which is a very challenging leadership task in HR management In change processes a fundamental distinction must be made between incremental change management and radical change management While incremental change takes place continuously and is integrated into everyday working life radical change represents a strategic realignment of the company which is largely associated with staff reductions and is intended to change the corporate culture This is particularly true in the case of restructuring where cost cutting programs play a decisive role in ensuring the long term survival of the company Employees are more willing to go along with incremental change also known as continuous improvement than radical change as they could also be affected by staff cuts This fuels employees fears and therefore often leads to high staff turnover
