Simulation Techniques of Digital Twin in Real-Time Applications Abhineet Anand,Anita Sardana,Abhishek Kumar,Srikanta Kumar Mohapatra,Shikha Gupta,2024-06-26 SIMULATION TECHNIQUES OF DIGITAL

TWIN IN REAL TIME APPLICATIONS The book gives a complete overview of implementing digital twin technology in real time scenarios while emphasizing how this technology can be embedded with running technologies to solve all other issues Divided into two parts with Part 1 focusing on simulated techniques in digital twin technology and Part 2 on real time applications of digital twin technology the book collects a significant number of important research articles from domain specific experts The book sheds light on the various techniques of digital twin technology that are implemented in various application areas It emphasizes error findings and respective solutions before the actual event happens Most of the features in the book are on the implementation of strategies in real time applications Various real life experiences are taken to show the proper implementation of simulation technologies The book shows how engineers of any technology can input their research ideas to convert to real scenarios by using replicas Hence the book has a collection of research articles from various engineers with expertise in different technologies from many regions of the world It shows how to implement the embedded real time data into technologies Specifically the chapters relate to the auto landing and cruising features in aerial vehicles automated coal mining simulation strategy the enhancement of workshop equipment and implementation in power energy management for urban railways This book also describes the coherent mechanism of digital twin technologies with deep neural networks and artificial intelligence Audience Researchers engineers and students in computer science software engineering and industrial engineering will find this book to be very useful

Multifunctional Materials for Electronics and Biomedical Devices M. M. Sinha,V. S. Pandey,Vinay Sharma,Sarbjee Singh,2025-10-10 This book presents select proceedings of the Advanced and Emerging Materials for Technological applications AEMTA 2024 It covers the latest findings in the field of materials science and engineering The topics covered include advanced materials and their properties smart and nanostructured materials computational materials science electronic optical and magnetic materials biomaterials and biomedical devices nano biomaterials and bio systems This book will also focus on research related to the study of novel materials for device fabrication manufacturing aerospace engineering biomedical and other related fields The book will be a valuable reference for researchers and professionals interested in materials science
