Advanced Well Completion Engineering Renpu Wan,2011-08-23 Once a natural gas or oil well is drilled and it has been verified that commercially viable it must be completed to allow for the flow of petroleum or natural gas out of the formation and up to the surface This process includes casing pressure and temperature evaluation and the proper installation of equipment to ensure an efficient flow out of the well In recent years these processes have been greatly enhanced by new technologies Advanced Well Completion Engineering summarizes and explains these advances while providing expert advice for deploying these new breakthrough engineering systems The book has two themes one the idea of preventing damage and preventing formation from drilling into an oil formation to putting the well into production stage and two the utilization of nodal system analysis method which optimizes the pressure distribution from reservoir to well head and plays the sensitivity analysis to design the tubing diameters first and then the production casing size so as to achieve whole system optimization With this book drilling and production engineers should be able to improve operational efficiency by applying the latest state of the art technology in all facets of well completion during development drilling completion and work over operations One of the only books devoted to the key technologies for all major aspects of advanced well completion activities Unique coverage of all aspects of well completion activities based on 25 years in the exploration production and completion industry Matchless in depth technical advice for achieving operational excellence with advanced solutions *Advanced Well Completion*

Engineering Shivraj Choudhary,2015-03 Well completion engineering is an important component part of oil and gas well construction and a basis of field development implementation It has a goal of ensuring regular and safe production and prolonging the production life of oil and gas wells The traditional mode of well completion engineering which had been adopted in China for a long time cannot meet the requirements of developing circumstances thus reform is needed After summing up domestic and foreign experience and lessons the new Advanced Well Completion concept has been presented Based on field geology and reservoir engineering it adopts the nodal analysis method and drilling well completion and production are organically integrated thus forming an integrated well completion engineering system 石油工业出版社,2008
