

## PSYCHOLOGY 2301 STUDY GUIDE

### CHAPTER 1 Psychology's Roots, Big Ideas, and Critical Thinking Tools

#### What is the definition of psychology?

The study of the mind and its function.

#### What is considered the birthdate of psychology, and why?

1879 is the year psychology is considered to be birthed because it was the year that William Wundt opened the first psychology laboratory.

#### What is critical thinking?

A way of thinking that uncovers hidden values, examines assumptions, weighs evidence, and assesses conclusions. Arguments are carefully considered rather than blindly accepted.

#### What is culture?

The continuing values, traditions, and behaviors shared by a group of people that is passed down from one generation to another.

#### To what does the nature-nurture debate refer?

It refers to the influence that genes and experience have in the development of psychological traits and behaviors. Many psychologists believe that traits and behaviors arise from the interaction of nature and nurture.

#### What is hindsight bias?

The inclination to believe, after discovering the outcome, that we could have predicted it.

#### What is replication?

The act of repeating the process of a research study, often using different participants in different situations, to see whether the basic finding can be copied.

#### What is a case study and what are its limitations?

When one individual or group is studied in depth, in the hope to reveal things that are true of all of us. Case study limitations include not being able to generalize the results to the wider population, researcher's bias being present, and consuming too much time.

#### What are some of the limitations of the survey method of research?

Limitations of the survey method include the wording effects such as interpretation, people not answering truthfully, people failing to answer questions, and a lack of personalization.

#### What is naturalistic observation?

Observing and recording behavior in naturally occurring situations without controlling the situation.

#### What is a random sample?

A sample that fairly represents every member of the population with an equal chance of presence.

#### Know the following terms:

**Double-blind procedure:** A procedure when neither the participant nor the research staff know about who has received the treatment or placebo.

**Placebo:** An inactive substance or condition that is often given to the control group rather than the treatment.

**Placebo effect:** Results that were caused solely off of expectation.

**Independent variable:** The factor that is manipulated in an experiment.

**Dependent variable:** The factor that is being measured in an experiment.

**Operational Definition:** A statement of the ways a researcher will measure behaviors or qualities.

**Illusory Correlation:** The phenomenon of believing there is a relationship between variables even though there is no such relationship.

**Correlation Coefficient:** A numerical measure of a correlation, measuring a statistical relationship between two variables.
