Learning Flash Media Server 3 William Sanders, 2008-03-31 If you're interested in recording and streaming media using Flash Media Server 3 FMS3 and Adobe's Real Time Messaging Protocol this unique 267 page PDF only book is the perfect primer. It is not a reference but a systematic guide to developing FMS3 applications using ActionScript 3.0 with chapters that focus on specific aspects of the server and how they work. FMS3 is very different from regular web servers. Because its open socket server technology stays connected until users quit the application you can stream audio, video, text, and other media in real time. FMS3 is also quite different from previous versions, a fact that web developers familiar with Flash Media Server 2 or Flash Communication Server 1.5 will quickly discover. Don't worry. With *Learning Flash Media Server 3* and a little experience with Flash CS3 and ActionScript 3.0 anyone can get up to speed in no time. You'll learn how to install FMS3, organize your development environment with Apache web server, and use the management console before diving into the whys and hows of recording and playing back streaming audio and video in VP6 and H.264 formats. Using the new Flash Media Encoder to stream and record video, camera and microphone settings, non-persistent client-side remote shared objects, two-way audio video communications, broadcasting and server-side bandwidth control, working with server-side files, the file class, server-side shared objects, server-side streams, setting up a software load handler using FMS3's new server-side NetStream, bringing in data and working with configuration files. At the heart of every chapter is a core set of code that shows the minimum requirements needed for different procedures. Beyond that, *Learning Flash Media Server 3* provides you with plenty of options for using FMS3's different versions: the full feature server, the streaming only server, and the limited user development server. It's a whole new world of media and this book puts you right at the doorstep. Ready to enter

Construction and Application Takenobu Tokunaga, Antonio Ortega, 2008-02-29 At the start of the 21st century we are now well on the way towards a knowledge intensive society in which knowledge plays ever more important roles. Thus research interest should inevitably shift from information to knowledge with the problems of building, organizing, maintaining and utilizing knowledge coming central issues in a wide variety of fields. The 21st Century COE program Framework for Systematization and Application of Large scale Knowledge sources COE LKR conducted by the Tokyo Institute of Technology is one of several early attempts worldwide to address these important issues. Inspired by this project LKR2008 aimed at bringing together diverse contributions in cognitive science, computer science, education and linguistics to explore design, construction, extension, maintenance, validation and application of knowledge. Responding to our call for papers we received 38 submissions from a variety of research areas. Each paper was reviewed by three Program Committee members. Since we were aiming at an interdisciplinary conference covering a wide range of topics concerning large scale knowledge resources LKR each paper was assigned a reviewer from a topic area outside the main thrust of the paper. This reviewer was asked to assess whether the authors described the motivation and importance of their work in a comprehensible manner even for readers in other research areas. Following a rigorous reviewing process we accepted 14 regular papers and 12 poster papers.
