**Introduction to Mathematical Programming** N. K. Kwak, Marc J. Schniederjans, 1987 This text presents current and classical mathematical programming techniques at an introductory level It provides case problems to stimulate interest and is aimed for undergraduate courses in management science operations and decision research and applied mathematics

Quantitative Decision Making with Spreadsheet Applications Lawrence L. Lapin, William D. Whisler, 2002 Written for students with a background in algebra this text provides a complete and modern treatment of basic management science methodology The authors survey the variety and power of management science tools working to alleviate students apprehension about the subject and to enable students to recognize on the job situations in which management science methodology can be successfully employed Emphasizing modeling skills for students of varying mathematical backgrounds the authors explain how to use Microsoft Excel spreadsheets to build skills as they work through problems In general problems are broken into several parts to make difficult concepts easy for students to learn This book s modular structure affords instructors maximum flexibility This text contains a special student version of Palisade Corporation s DecisionTools Suite containing Risk PrecisionTree BestFit TopRank and RiskView This software is expressly provided for student use and requires student authorization to unlock the software for its full one year license Professional customers may use the software for 30 days at which point they must contact Palisade Corporation for a professional version should they wish to continue using the software

look at optimization theory in uncertain environments Real life management decisions such as buy sell decisions in the stock market are almost always made in uncertain environments Is it possible to make model decision problems to fit these circumstances Once constructed can these models be solved In Uncertain Programming Baoding Liu answers both of these questions in the affirmative and goes on to lay a solid foundation for optimization in generally uncertain environments Uncertain Programming describes the basic concepts of mathematical programming provides a genetic algorithm for optimization problems and introduces the techniques of stochastic and fuzzy simulation After examining some basic results of expected value models the book moves on to explore chance constrained programming with stochastic parameters and illustrate applications of chance constrained programming models Dr Liu discusses dependent chance programming in stochastic environments and extends both chance constrained and dependent chance programming from stochastic to fuzzy environments He then constructs a theoretical framework for fuzzy programming with fuzzy rather than crisp decisions This remarkable and revolutionary book Lays a foundation for optimization theory in uncertain environments Provides a unifying principle for dealing with stochastic and fuzzy programming Incorporates the most recent developments in the field Emphasizes modeling ideas evolutionary computation and applications of uncertain programming Uncertain Programming is a reliable authoritative and eye opening guide for researchers and engineers in operations research management science business management information and systems science and computer science

*Goal Programming Methods for Multiple Objective Integer Programs* Sang M. Lee,1979     *Introduction to Management Science* Bernard W. Taylor,1996 This introduction to the often mathematically rigorous techniques and applications of management science is designed to make the subject accessible for students with no mathematical background or skills It focuses on management science not only as a collection of techniques and processes but as a philosophy and method for approaching problems in a logical manner as skill that is applicable across disciplines and endeavours in all types of jobs and organizations The author s perspective is contemporary his approach hands on and his pedagogy abundant supportive and user friendly for students and instructors alike
