Black Ops Advertising Mara Einstein,2016-09-01 From Facebook to Talking Points Memo to the New York Times often what looks like fact based journalism is not It s advertising Not only are ads indistinguishable from reporting the Internet we rely on for news opinions and even impartial sales content is now the ultimate corporate tool Reader beware content without a corporate sponsor lurking behind it is rare indeed Black Ops Advertising dissects this rapid rise of sponsored content a strategy whereby advertisers have become publishers and publishers create advertising all under the guise of unbiased information Covert selling mostly in the form of native advertising and content marketing has so blurred the lines between editorial content and marketing message that it is next to impossible to tell real news from paid endorsements In the 21st century instead of telling us to buy buy BUY marketers engage with us so that we share share SHARE the ultimate subtle sell Why should this concern us Because personal data personal relationships and our very identities are being repackaged in pursuit of corporate profits Because tracking and manipulation of data make likes and tweets and followers the currency of importance rather than scientific achievement or artistic talent or information the electorate needs to fully function in a democracy And because we are being manipulated to spend time with technology to

interact with friends to always be on even when it is to our physical and mental detriment *The New Review Economy* Alison N. Novak,2020-11-02 This book examines third party review sites TPRS and the intersection of the review economy and neoliberal public relations in order to understand how users and organizations engage the 21st century global review economy The author applies communication and digital media theories to evaluate contemporary case studies that challenge TPRS and control over digital reputation Chapters analyze famous cases such as the Texas photographer who sued her clients for negative reviews and activists using Yelp to protest the hunt of Cecil the Lion to illustrate the complicated yet important role of TPRS in the review economy Theories such as neoliberal public relations digital dialogic communication and cultural intermediaries help explain the impact of reviews and how to apply lessons learned from infamous cases This nuanced and up to date exploration of the contemporary review economy will offer insights and best practice for academic researchers and upper level undergraduate students in public relations digital media or strategic communication programs
