

HIGH YIELD SAVINGS ACCOUNTS (HYSA) & HIGH YIELD CASH ACCOUNTS

KEY POINTS

- Use over conventional savings account for higher returns
- Safe investing option for cash you need on hand, such as an emergency fund or upcoming expense/investment
- Not a replacement for long term investing
 - Returns still lower than average historical market returns
 - Not tax efficient compared to other investments, which erodes into the effective return, as well as compounding effect
 - Interest rates may not always be this high
- Pick an account based on features, convenience, and safety, not over a small difference in interest rate
 - A 0.3% difference won't make much difference for the typical \$ amount held in these accounts
 - Interest rates can change with little notice
 - Beware short term higher interest promotions designed to draw you in, but which lower returns later

Learn how to build logic into your apps by configuring Salesforce.com Lightning Process Builder and Visual Workflow software tools to meet the needs of your organization without the use of code. You will be able to build workflow diagrams on the Salesforce.com platform and perform complex logic. Individuals who have created workflow diagrams in other applications e.g. Microsoft Visio will feel very comfortable using these two tools from Salesforce. If you find yourself in a situation where a standard Salesforce configuration does not meet your needs, you can always rely on a developer to extend the functionality through Visualforce and Apex code. What if you could take back that control and not rely on a developer or consultant? With two new technologies, Process Builder and Visual Workflow introduced onto the Salesforce.com platform, you can accomplish much of what was normally handled with Apex code. Lightning Process Builder and Visual Workflow both allow for advanced logic that standard configuration such as Salesforce.com Workflow cannot do. Salesforce.com Lightning Process Builder and Visual Workflow details how these technologies can be used to create a call center application that guides operators through a call with screens that change based on the caller's responses. Automatically submit approvals to speed up and streamline your business. Update related records for any object being modified including standard and custom objects.
