[Think Before You Like](#) Guy P. Harrison, 2017. Social media has pitfalls: misinformation, pseudoscience, fraud, and irrational beliefs presented in an attractive, easy-to-share form. It reinforces your biases by tracking your preferences; it sends only filtered newsfeeds so that you rarely see anything that might challenge your set notions. Harrison demonstrates how critical thinking can enhance the benefits of social media while giving readers the skills to guard against its dangers. He also suggests ways to protect yourself against privacy invasion, trolls, and the confusion over fake news versus credible journalism. *Vanity Fair*, 2018.

The Hidden Psychology of Social Networks: How Brands Create Authentic Engagement by Understanding What Motivates Us Joe Federer, 2020-09-15. From the former Head of Brand Strategy at Reddit comes a proven and thought-provoking approach to the digital economy and how brands can create authentic engagement that is rooted in the fundamental motivations behind human psychology. Leading marketing practitioner and thought leader Joe Federer draws on evolutionary biology, anthropology, neuroanatomy, and psychology, as well as more than a decade of hands-on experience, to explain why people act so differently in various online spaces and what they are seeking from participating in each one. With a framework based on Freud's Id, Ego, and Superego model of the human psyche, he demonstrates how the internet is a digital reflection of the collective human psyche and how different social networks correspond to different mindsets: platforms like Reddit to the unfiltered Id, Facebook and Twitter to the managed Ego, and Instagram to the ideal Superego. In the same way you behave differently when you're home alone, out with friends, communicating with family, or interacting with coworkers, people act and

express themselves differently in these various online spaces Context matters Understanding this will enable you to develop and execute effective engagement strategies to reach your target audiences on each social network Learn how to create content that drives sharing and word of mouth how brands can fit natively into different types of social channels how to balance branded social presences across different networks why authenticity will only grow in importance to consumers Fascinating and deeply compelling The Hidden Psychology of Social Networks will equip you to make vastly more efficient use of your media buys establish more thoughtful strategies develop better creative and in the end deliver more effective marketing that provides value **The Georgia Review** ,2018 **Overcoming Trumpism** Larry N.
