Tube Ritual Brian G. Johnson,2018-10-02 A successful YouTuber shares his strategic system for growing a channel and going from zero to thousands of subscribers You have to start with no videos views or subscribers Furthermore more than four hundred minutes of content is uploaded to YouTube each minute To say that it s challenging to grow a channel is an understatement In fact less than three percent of YouTube channels ever gain more than ten thousand subscribers Yet in a one year period Brian G Johnson gained 10 623 subscribers and drove over half a million video views Truly beginning from zero Brian had no previous YouTube success to draw from and had to learn the nuances of camera settings editing options and technical details that often become roadblocks Furthermore he did it in a small and competitive niche the YouTube video marketing niche How you ask By researching testing and tweaking various video growth methods over a one year period in order to identify why the YouTube algorithm promotes one video over another Ultimately this led to the creation of a video ritual based on his findings a series of actions according to a prescribed order More than a mere guide Tube Ritual is a one year case study with the goal of driving more views and converting more viewers into subscribers For those already creating videos or who want to in the future Tube Ritual contains detailed step by step information that plain works Covering topics from branding to thumbnails video structure YouTube SEO video calls to action playlist strategies channel strategies and more Tube Ritual leaves no stone unturned

Original Strategies for Training and Educational Initiatives in Bioinformatics Hugo Verli,Raquel Cardoso de Melo Minardi,2022-10-07 *Higher Education Computer Science* Jenny Carter,Michael O'Grady,Clive Rosen,2018-09-21 There is currently a great emphasis on teaching quality in Higher Education In the UK the Teaching Excellence Framework and the National Student Survey have contributed significantly to this focus Additional support for staff to develop teaching skills has also come from the Higher Education Academy whose fellowship scheme encourages HE

staff to focus on their practice in the classroom The growth in the number of students attending university has resulted in a much wider range of learning styles amongst them Many students do not fit the idealised average of being adept at learning from primarily text based media Two further trends are also driving change and innovation in academic staff teaching The first is the availability of online teaching materials such as MOOCs The second is the emphasis now given to student postgraduate employability represented by certain aspects of the Teaching Excellence Framework that require students not only to know information but also to be able to articulate that knowledge and to demonstrate their skills With a desire to enable our students to achieve their highest potential many staff undertake initiatives to facilitate learning that accommodate a wide range of learning styles This book focuses on approaches to teaching and learning within the discipline of Computer Science The book consists of a selection of chapters that describe a particular teaching activity or topic within Computing in HE presented in such a way that other practitioners can adopt and adapt them as a way of helping them to develop their own teaching It provides a number of practical cases of putting theory into practice when teaching Computer Science to both undergraduate and postgraduate students in Higher Education institutions A chapter on the importance of developing soft skills and a professional online presence is also included as an essential part of preparing the students for their future employment
