book philosopher Christian Jim Stump provides the reader with new eyes for a journey through time the origin of the soul
suffering and morality and reveals how the latest scientific findings about what it means to be human have led him to a
deeper and more authentic faith Francis S Collins Director of the Human Genome Project and Founder of BioLogos author of

our universe into one calendar week what can we learn about God s creative process and priorities and where humans fit in If
humans are created in the image of God what does evolution have to teach us about our species and our place in creation
What about the soul How can we understand our transcendent qualities if the human body is the product of evolution How
does evolutionary science help us understand how God might use pain and suffering for important and good purposes Does it
have to be one or the other science or religion or is there a third way one that not only preserves faith in the face of modern
science but leads to a stronger more relevant and more authentic faith Deeply researched and a delight to read The Sacred
