TABLE OF CONTENTS: About Research; non-graphing calculators are allowed only if they have the computational capabilities described previously. The following, however, are not permitted: powerbooks and portable computers, pocket organizers, electronic writing pads, pen input devices, or devices with typewriter-style or QWERTY keyboards. ABOUT THE REVIEW SECTIONS: As mentioned earlier, this book has a review chapter for each of the four topics covered on the exam. The following are the four review chapters in this book that cover the topics on the AP Statistics exam: Exploring Data, Planning a Study, Anticipating Patterns, and Statistical Inferences. The review chapters provide a thorough discussion of the material tested on the exam. By studying the review chapters and by taking the practice tests, you can prepare yourself to score high on the AP Statistics exam. SCORING THE EXAM: The multiple-choice section of the exam is scored by crediting each correct answer with one point and deducting one-fourth of a point for each incorrect answer. Unanswered questions receive neither credit nor deduction. The free-response questions are graded by readers chosen from around the country for their familiarity with the AP Program. Each free-response question is read and scored with the reader providing the score on a 0 to 4 scale, 0 being the lowest and 4 the highest. The free-response questions are scored based on the statistical knowledge and communication the student used to answer the question. The statistical knowledge criteria include identifying the important concepts of the problem and demonstrating statistical concepts and techniques that result in a correct solution of the problem. The communication criteria include an explanation of what was done and why, along with a statement of conclusions drawn. Once the free-response questions have been graded by all of the readers, the scores are converted. The open-ended questions count as 75% of the free-response score; the investigative task question counts as 25%. SCORING THE MULTIPLE CHOICE SECTION: For the multiple-choice section, use this formula to calculate your raw score:  $\text{Number Right} - \text{Number Wrong} \times \frac{1}{4}$ . Raw Score, round to the nearest whole number. Note: Do not include unanswered questions in the formula. SCORING THE FREE RESPONSE QUESTIONS: For the free-response section, use this formula to calculate your raw score:  $5 \times \text{Open Ended Questions} + 75\% \times 1 \times \text{Investigative Task Question} + 25\%$ . Raw Score. THE COMPOSITE SCORE: To obtain your composite score, use the following method:  $\text{Multiple Choice Raw Score} + \text{Free Response Raw Score} + \text{Raw Score}$ . AP grades are interpreted as follows: 5 extremely well qualified, 4 well qualified, 3 qualified, 2 possibly

qualified and 1 no recommendation SCORES THAT RECEIVE COLLEGE CREDIT AND OR ADVANCED PLACEMENT Most colleges grant students who earn at least a 3 college credit and or advanced placement You should check with your school guidance office about specific college requirements STUDYING FOR YOUR AP EXAMINATION It is never too early to start studying The earlier you begin the more time you will have to sharpen your skills Do not procrastinate Cramming is not an effective way to study since it does not allow you the time needed to learn the test material It is very important for you to choose the time and place for studying that works best for you Some students may set aside a certain number of hours every morning to study while others may choose to study at night before going to sleep Other students may study during the day while waiting on a line or even while eating lunch Only you can determine when and where your study time will be most effective But be consistent and use your time wisely Work out a study routine and stick to it When you take the practice exams try to make your testing conditions as much like the actual test as possible Turn your television and radio off and sit down at a quiet table free from distraction Make sure to time yourself Complete the practice tests score your tests and thoroughly review the explanations for the questions you answered incorrectly However do not review too much during any one sitting Concentrate on one problem area at a time by reviewing the question and explanation and by studying our reviews until you are confident that you completely understand the material Since you will be allowed to write in your test booklet during the actual exam you may want to write in the margins and spaces of this book when practicing However do not make miscellaneous notes on your answer sheet Mark your answers clearly and make sure the answer you have chosen corresponds to the question you are answering Keep track of your scores This will enable you to gauge your progress and discover general weaknesses in particular sections You should carefully study the reviews that cover the topics causing you difficulty as this will build your skills in those areas To get the most out of your studying time we recommend that you follow the Study Schedule It details how you can best budget your time TEST TAKING TIPS Although you may be unfamiliar with tests such as the Advanced Placement exams there are many ways to acquaint yourself with this type of examination and help alleviate your test taking anxieties Listed below are ways to help yourself become accustomed to the AP exam some of which may also be applied to other standardized tests Become comfortable with the format of the AP Examination in Statistics When you are practicing to take the exams simulate the conditions under which you will be taking the actual tests You should practice under the same time constraints as well Stay calm and pace yourself After simulating the test only a couple of times you will boost your chances of doing well and you will be able to sit down for the actual test much more confidently Know the directions and format for each section of the exam Familiarizing yourself with the directions and format of the different test sections will not only save you time but will also ensure that you are familiar enough with the AP exam to avoid anxiety and the mistakes caused by being anxious Work on the easier questions first If you find yourself working too long on one question make a mark next to it in your test booklet and continue After you have answered all of the questions that you

can go back to the ones you have skipped Use the process of elimination when you are unsure of an answer If you can eliminate three of the answer choices you have given yourself a fifty fifty chance of getting the item correct since there will only be two choices left from which to make a guess If you cannot eliminate at least three of the answer choices you may choose not to guess as you will be penalized one quarter of a point for every incorrect answer Questions not answered will not be counted Be sure that you are marking your answer in the oval that corresponds with the correct item in the test booklet Since the multiple choice section is graded by machine marking the wrong answer will throw off your score

**The Practice of Statistics AP** Daniel S. Yates, David Moore, George P. McCabe, 1999 When The College Board created the Advanced Placement AP statistics course several years ago they recommended several college books that closely match their syllabus The top two books on this short list were Moore and McCabe s Introduction to the Practice of Statistics and Moore s The Basic Practice of Statistics

Still these book lacked several key elements such as activities and special topics So starting with the classic features of IPS and BPS veteran AP statistics instructor Dan Yates has fashioned a text that perfectly matches the College Board s recommended syllabus The result is the 1 book in the AP statistics market The Practice of Statistics TI 83 Graphing Calculator Enhanced Because this book was written for bright high school students who are at an advanced reading level it has also sold to many colleges and universities These institutions love the idea of a David Moore book integrating the TI 83 Graphing Calculator which is the most popular statistics calculator in the market For colleges and universities who require or recommend that their students use the TI 83 Graphing Calculator TPS is the appropriate text 5 Steps to a 5 AP Statistics 2017 Cross-Platform Prep Course Duane C.
