Holt, 2013-04-01 Many students of linear algebra hit a wall at mid semester Having spent the first part of the term doing
mostly computational work they are unprepared for the rigors of conceptual thinking in an abstract setting that is frequently
the focus of the second half of the course Holt s Linear Algebra with Applications blends computational and conceptual topics
throughout Early treatment of conceptual topics in the context of Euclidean space gives students more time and a familiar
setting in which to absorb them This organization also makes it possible to treat eigenvalues and eigenvectors earlier than in
most texts Abstract vector spaces are introduced later once students have developed a solid conceptual foundation Concepts
and topics are frequently accompanied by applications to provide context and motivation Because many students learn by
example Linear Algebra with Applications provides a large number of representative examples over and above those used to
introduce topics The text also has over 2500 exercises covering computational and conceptual topics over a range of
difficulty levels **Beyond Formulas in Mathematics and Teaching** Daniel Chazan, 2000-01-01 Based on the author s
experience as a researcher and teacher of lower track students Beyond Formulas in Mathematics and Teaching illuminates
the complex dynamics of the algebra classroom From within this setting Daniel Chazan thoughtfully explores topics that
concern all dedicated educators how to really know one s students how to find engaging material and how to inspire
meaningful classroom conversations Throughout he addresses the predicaments that are central to the lives of teachers who
work in standard educational settings By highlighting teaching dilemmas Chazan prompts readers to consider what their own
responses would be in similar situations With an eye to ways of restructuring roles and relationships Beyond Formulas in
