2012 International Plumbing Code Commentary:

2012 International Plumbing Code Commentary International Code Council, 2012-04-23 PREFACE Significant changes in the plumbing industry as well as in manufacturing technology had become so commanding that a radically new approach to the design and installation of plumbing systems seemed an imperative The reply to that imperative was the International Plumbing Code a document emphasizing prescriptive and performance related provisions As a follow up to the International Plumbing Code we offer a companion document the International Plumbing Code Commentary The basic appeal of the Commentary is thus it provides in a small package and at reasonable cost thorough coverage of many issues likely to be dealt with when using the International Plumbing Code and then supplements that coverage with historical and technical background Reference lists information sources and bibliographies are also included Throughout all Of this strenuous effort has been made to keep the vast quantity of material accessible and its method of presentation useful With a comprehensive yet concise summary of each section the Commentary provides a convenient reference for plumbing regulations In the chapters that follow discussions focus on the full meaning and implications of the code text Guidelines suggest the most effective method of application and the consequences of not adhering to the code text Illustrations are provided to aid understanding they do not necessarily illustrate the only methods of achieving code compliance The format of the Commentary includes the full text of each section table and figure in the code followed immediately by the commentary applicable to that text Each section s narrative includes a statement of its objective and intent and usually includes a discussion about why the requirement commands the conditions set forth Code text and commentary text are easily distinguished from each other All code text is shown as it appears in the International Plumbing Code and all commentary is indented below the code text and begins with the symbol Readers should note that the Commentary is to be used in conjunction with the International Plumbing Code and not as a substitute for the code The Commentary is advisory only the code official alone possesses the authority and responsibility for interpreting the code

compounds the challenges Increasingly alternative water sources such as graywater untreated wastewater that does not include water from the toilet but generally includes water from bathroom sinks showers bathtubs clothes washers and laundry sinks and stormwater water from rainfall or snow that can be measured downstream in a pipe culvert or stream shortly after the precipitation event are being viewed as resources to supplement scarce water supplies rather than as waste to be discharged as rapidly as possible Graywater and stormwater can serve a range of non potable uses including irrigation toilet flushing washing and cooling although treatment may be needed Stormwater may also be used to recharge groundwater which may ultimately be tapped for potable use In addition to providing additional sources of local water supply harvesting stormwater has many potential benefits including energy savings pollution prevention and reducing the impacts of urban development on urban streams Similarly the reuse of graywater can enhance water supply reliability and extend the capacity of existing wastewater systems in growing cities Despite the benefits of using local alternative water sources to address water demands many questions remain that have limited the broader application of graywater and stormwater capture and use In particular limited information is available on the costs benefits and risks of these projects and beyond the simplest applications many state and local public health agencies have not developed regulatory frameworks for full use of these local water resources To address these issues Using Graywater and Stormwater to Enhance Local Water Supplies analyzes the risks costs and benefits on various uses of graywater and stormwater This report examines technical economic regulatory and social issues associated with graywater and stormwater capture for a range of uses including non potable urban uses irrigation and groundwater recharge Using Graywater and Stormwater to Enhance Local Water Supplies considers the quality and suitability of water for reuse treatment and storage technologies and human health and environmental risks of water reuse The findings and recommendations of this report will be valuable for water managers citizens of states under a current drought and local and state health and environmental agencies *Virginia Administrative Law Appendix* ,2016 *2012 International Property Maintenance Code Commentary* International Code Council,2012-03-26 For a truly solid working knowledge of the 2012 International Property Maintenance Code IPMC you need a resource that will explain the technical requirements and then explore how those requirements can be applied to everyday on the job situations The 2012 INTERNATIONAL PROPERTY MAINTENANCE CODE COMMENTARY does just that The book s approach is simple yet highly effective provide users with the full text and illustrations of the code itself and close each section with commentaries on its practical implications Coverage also includes a discussion of rationale for the various provisions as well as the potential consequences for not adhering to them Developed by the highly regarded International Code Council the book aims to offer an enhanced understanding of the 2012 IPMC making it a must have for code officials engineers architects inspectors plan examiners contractors and anyone seeking proficiency in the code "Code of Massachusetts regulations, 2012" ,2012 Archival snapshot of entire looseleaf Code of Massachusetts Regulations held by the Social Law Library of
